Between 1890 and 1920 over one-third of the peasants of Mount Lebanon left their villages and traveled to the Americas. This book traces the journeys of these villagers from the ranks of the peasantry into a middle class of their own making. *Inventing Home* delves into the stories of these travels, shedding much needed light on the impact of emigration and immigration in the development of modernity. It focuses on a critical period in the social history of Lebanon--the "long peace" between the uprising of 1860 and the beginning of the

French mandate in 1920. The book explores in depth the phenomena of return emigration, the questioning and changing of gender roles, and the rise of the middle class. Exploring new areas in the history of Lebanon, *Inventing Home* asks how new notions of gender, family, and class were articulated and how a local "modernity" was invented in the process. Akram Khater maps the jagged and uncertain paths that the fellahin from Mount Lebanon carved through time and space in their attempt to control their future and their destinies. His study offers a significant contribution to the literature on the Middle East, as well as a new perspective on women and on gender issues in the context of developing modernity in the region.

The strengths and failures of the American college, and why liberal education still matters As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover

their passions and test ideas and values with the help of teachers and peers—is in danger of becoming a thing of the past. In *College*, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations.

The key to a harmonious work environment is not by working among people with similar personalities whom you never clash with. Instead, learning to interact effectively with difficult coworkers is essential for success. Most of us are going to work today with individuals who at times come across as incompetent, lazy, spotlight-hugging, whiny, or backstabbing. Then, tomorrow we go to work with them again and again. Like it or not, the bulk of our waking hours are spent with people at work—people who can grate on our nerves. Communications expert Renee Evenson thoroughly explains how anyone can learn how to confront head-on the difficult situations that can arise when dealing with these personalities, before they fester and spread. In *Powerful Phrases for Dealing with Difficult People*, Evenson shares practical and easy-to-use tactics such as: Thirty common personality traits,

behaviors, and workplace scenarios along with the phrases that work best with each. Nonverbal communication skills to back up your words. Sample dialogues that demonstrate how phrasing improves interactions. A five-step process for moving from conflict to resolution. “Why This Works” sections that provide detailed explanations. Button-pushing situations are going to come up today at work—and tomorrow too. Don't let them rent space inside of you and turning everything to mold. Instead, choose to deploy simple phrases to regain control and resolve conflicts. When you do, you, your colleagues, and your company will be all the better for it!

Carnage in the classroom, misogynists in high office, sociopaths in uniform, masculinity is a killer. From styles of dress to the stunted capacity for expressing a diversity of emotions, becoming a man involves killing off and repudiating anything that in our society is held as feminine. When a person is unable to show compassion and tenderness, or when exposed for their frailties, feels angry and humiliated, they have problems. Problems that none of us are immune to.

Masculinity, Cremin provocatively declares, is a generic disorder of a sick society that afflicts even the best of us. Neither a condition of being human nor even of male, it is a disorder, as she illustrates, of a capitalist society that depends and even thrives upon its very symptoms. From the perspective of a trans woman raised to be a man, the book maps the disorder and speculates on the possible means to overcome it. Instead of signifying weakness, catastrophes can be prevented when the qualities men often fear and women often feel subordinated to are prioritised, affirmed and nourished.

Drawing, amongst others, on Marx and Freud, Cremin eloquently demonstrates why there can be no future other than one in which we are all reconciled as a society with the feminine. In such a future, the terms 'masculine' and 'feminine' will neither define us nor determine our relationship to
