From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations--featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does--and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll

learn what to say when • coworkers push their work on you--then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged--or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."--Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."--Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces--and to do so with grace, confidence, and a sense of humor."--Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."--Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

The U.S. Department of Labor classifies nontraditional careers for women as those in which 25 percent or less of the people working in that particular career are female. Educational requirements for these rewarding jobs range from apprenticeship training to doctorate degrees. Careers include Business Executive, Architect, Computer Software Engineer, Chiropractor, Police Officer, Industrial Engineer, Firefighter, Civil Engineer, Construction Manager, and Carpenter, Electrician, and Airplane Pilot. There are also many rewarding careers that are not traditionally sought-after by male workers. This book features 5 careers in which fewer than 20 percent of males are employed. In each career article, we provide an overview of the career and typical work environments, recommended high school classes and activities, educational requirements, personal skills, methods of exploring the career while still in high school, tips on landing a job, typical employers, information on the employment outlook and hot specialties, and contact information for professional associations. The primary objective of this Study was to determine whether or not the COCESS (Contractor Operated Civil Engineer Supply Store) concept is an acceptable technique for providing materiel support to the Civil Engineering (CE) function in the Department of Defense (DoD). This examination was to consider the COCESS concept separately for items designated for local purchase at installation level and for those items required to be requisitioned from inventory control points. During the course of research for this Study, two additional areas of management interest were identified: -- (a) The Military Service systems for the collection of materiel to support Specific Jobs, and for the scheduling of those jobs; and, (b) The potential for interservice consolidation of the procurement of civil engineering materiel within local geographic areas or regions. Each of these subjects was discussed in one of the preceding Chapters of this Report.
