Approximately 1500 scientists from around the globe participated in the International Grassland Congress at the University of Kentucky in 1981, sharing existing knowledge of grasslands and exploring methods for increasing the productivity of livestock/forage systems so as to better feed mankind while maintaining or improving environmental quality. Of the nearly 500 papers presented on previously unpublished original research or experimental research and development projects, 273 were selected for inclusion in this book. They cover the current basic and applied research on production and utilization of forages from grasslands the world over.
