In 1942 Pauli Murray, a young black woman from North Carolina studying law at Howard University, visited a constitutional law class taught by Caroline Ware, one of the nation's leading historians. A friendship and a correspondence began, lasting until Murray's death in 1985. Ware, a Boston Brahmin born in 1899, was a scholar, a leading consumer advocate, and a political activist. Murray, born in 1910 and raised in North Carolina, with few resources except her intelligence and determination, graduated from college at 16 and made her way to law school, where she organized student sit-ins to protest segregation. She pulled her friend Ware into this early civil rights activism. Their forty-year correspondence ranged widely over issues of race, politics, international affairs, and--for a difficult period in the 1950s--McCarthyism. In time, Murray became a labor lawyer, a university professor, and the first black woman to be ordained an Episcopal priest. Ware continued her work as a social historian and consumer advocate while pursuing an international career as a community development specialist. Their letters, products of high intelligence and a gift for writing, offer revealing portraits of their authors as well as the workings of an unusual female friendship. They also provide a wonderful channel into the social and political thought

of the times, particularly regarding civil rights and women's rights.

The potential that biomass energy has to supplement traditional fuels and reduce greenhouse gas emissions has put it front and center in the plan to replace fossil-based fuels with renewable fuels. While much has been written about biomass conversions, no single textbook contains all the information needed to teach a biomass conversion course—until now. Introduction to Biomass Energy Conversions presents a comprehensive review of biomass resources available for conversion into heat, power, and biofuels. The textbook covers biomass characterization and discusses facilities, equipment, and standards (e.g. ASTM or NREL) used for analysis. It examines the range of biomass resources available for conversion and presents traditional biomass conversion processes along with extensive biomass characterization data tables, illustrations, and graphical presentations of the various biomass energy conversion processes. The author also describes how to set up a laboratory for biomass energy conversion, and presents economics and sustainability issues. Loaded with real-world examples, the text includes numerous worked examples and problems in each chapter. No one knows what the price of oil will be next year or in future decades. It is governed by many factors other than supply and demand (politics, wars, etc.), however, whatever the future of energy is, bio-fuels will play an important role. This technical guide prepares students for managing bio-refineries, no matter what type of bio-fuel is produced. It also provides practicing engineers with a resource for starting a small bio-fuel business.

Research Methods for Public Administrators UNC Press Books  
Research Methods for Public Administrators contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students, and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic statistics to more advance techniques. The basics of conducting experiments, survey research, case studies, and focus groups are discussed. Data organization, management, and analysis are also covered, as are data analysis and hypothesis testing. Descriptive and inferential statistics are discussed and illustrated with examples. The book also includes a chapter on obtaining and analyzing secondary data (data already collected for other purposes) and a chapter on reporting and presenting research results to a variety of audiences. This is a general textbook written primarily for students of public administration and practitioners in public and not-for-profit organizations. It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies. The material is discussed at a level to be accessible and with enough detail to be useful. New to the seventh edition: Additional and expanded material on qualitative research, big data, metadata, literature reviews, and causal inference New material on experiments and experimental research New examples and

Electronic Communication Equipment Introduction to Biomass Energy Conversions Media product portfolios are rapidly becoming the predominant shared characteristic of media companies worldwide. The phenomenon involves firms from all kinds of media--newspapers, magazines, television, radio, cinema--and is found in enterprises ranging from small, local firms to large, globalized companies. This volume is the result of a coordinated effort of scholars in the United States and Europe to explore the characteristics, processes, challenges, and implications of media product portfolios. This book breaks new ground by introducing the concepts of product portfolio management and applying them to media companies in a comprehensive manner. It draws from knowledge and methods of analyzing product portfolio management in other industries, applies that knowledge to media industries, and analyzes current practices in media firms. The process and issues of portfolio strategy, development, and management are complex and wide ranging. The book explores the development of media product portfolios from an interdisciplinary perspective, providing insight from business, economic, organizational, and communication approaches. The book explores why and how firms develop portfolios, how company strategy and organizational development relate to portfolios, the role of leaders in developing portfolio activities, economic

and economic geography issues in portfolios, production issues, challenges in managing multiple products and operations, issues of marketing and branding issues in portfolios, personnel implications, and the unique challenges in the internationalization of media portfolio operations. Daily Math Practice Jonathan Irwin is best known as the man who, following the tragic death of his son at 22 months old, set up the Jack & Jill Foundation so that other parents would not have to go through the hardship his family did to nurse their sick child at home. He is also an outspoken critic of the state's lack of support for these families. What is less well-known is his intriguing background. He was very involved in the Irish horse-racing industry and ran Goffs bloodstock sales for many years, including at the time of the kidnapping of Shergar, which is detailed in the book. He was also involved in the early days of Ryanair and we get a fascinating insight into his relationship with Michael O'Leary, who had a very different vision from Jonathan as to where the company should go. He was also head of the Irish Sports Council and was instrumental in bringing the Tour de France to Ireland for the first time in 1997. The book gives full details of the struggles to establish and maintain the charity and its ongoing fund-raising efforts.
