Since 1958 the Maritime Administration  
has continuously conducted instructions in  
use of collision avoidance radar for  
qualified U.S. seafaring personnel and  
representatives of interested Federal and  
State Agencies. Beginning in 1963, to  
facilitate the expansion of training  
capabilities and at the same time to  
provide the most modern techniques in  
training methods, radar simulators were  
installed in Maritime Administration's  
three region schools. It soon became  
apparent that to properly instruct the  
trainees, even with the advanced  
equipment, a standardize up-to-date  
instruction manual was needed. The first  
manual was later revised to serve both as  
a classroom textbook and as an onboard  
reference handbook. This newly updated  
manual, the fourth revision, in keeping with  
Maritime Administration policy, has been  
restructured to include improved and more  
effective methods of plotting techniques

for use in Ocean, Great Lakes, Coastwise  
and Inland Waters navigation. Robert J.

Agribusiness Management uses four  
specific approaches to help readers  
develop and enhance their capabilities as  
agribusiness managers. First, this edition  
of the book offers a contemporary focus  
that reflects the issues that agribusiness  
managers face both today and are likely to  
face tomorrow. Specifically, food sector  
firms and larger agribusiness firms receive  
more attention in this edition, reflecting  
their increasing importance as employers  
of food and agribusiness program  
graduates. Second, the book presents  
conceptual material in a pragmatic way  
with illustrations and examples that will  
help the reader understand how a specific  
concept works in practice. Third, the book  
has a decision-making emphasis,  
providing contemporary tools that readers  
will find useful when making decisions in  
the contemporary business environment.  
Finally, Agribusiness Management offers a  
pertinent set of discussion questions and  
case studies that will allow the reader to

apply the material covered in real-world  
situations.
