India will be the world's most populous country by

2024 and its third largest economy by 2028. But the size of our population and a sense of historical greatness alone are insufficient to guarantee we will fulfil our ambition to become a global power. Our approach to realize this vision needs more than just planning for economic growth. It requires a shift in attitudes. In *Making India Great*, Aparna Pande examines the challenges we face in the areas of social, economic, military and foreign policy and strategy. She points to the dichotomy that lies at the heart of the nation: our belief in becoming a global power and the reluctance to implement policies and take actions that would help us achieve that goal. The New India holds all the promise of greatness many of its citizens dream of. Can it become a reality? The book delves into this question.

This book introduces the reader to the use of R and RStudio as a platform for analyzing financial and economic data. The book covers all necessary knowledge for using R, from its installation in your computer to the organization and development of scripts. For every chapter, the book presents practical and replicable examples of R code, providing context and facilitating the learning process. This is what you'll learn from this book: Using R and RStudio: In chapter 01 we will discuss the use of R as a programming platform designed to solve data-related problems in finance and economics. In chapter 02 we will explore basic commands and many functionalities of R and RStudio that will increase your productivity. Importing financial and economic data: In chapters 04 and 05 we will learn to import data from local files, such as an Excel spreadsheet, or the internet, using specialized packages that can download financial and economic data such as stock prices, economic indices, the US yield curve, corporate financial statements, and many others. Cleaning,

structuring and analyzing the data with R: In chapters 06 and 07 we will concentrate our study on the ecosystem of basic and advanced classes of objects within R. We will learn to manipulate objects such as numeric vectors, dates and whole tables. In chapters 08 and 09 we'll study to use the programming tools to solve data-related problems such as cleaning and structuring messy data. In chapter 11 we will learn applications of the most common econometric models used in finance and economics including linear regression, generalized linear model, Arima model and others. Creating visual analysis of data: In chapter 10 we'll learn to use functions from package ggplot2 to create clever visualizations of our datasets, including the most popular applications in finance and economics, time series and statistical plots. Reporting your results: In chapter 12 we will see how to report our data analysis using specialized packages and the RMarkdown technology. Includes the topic of presenting and exporting tables, figure and models to a written report. Writing better and faster code: In the last chapter of the book we discuss best programming

practices with R. We will look at how to profile code and search for bottlenecks, and improving execution time with caching strategies using package memoise, C++ code with Rcpp and parallel computing with furr. All the material used in the book, including code examples separated by chapters, slides and exercises is publicly available on the Internet and distributed with a R package called afedR. It includes data files and several functions that can make it easier to run the examples of the book. If you plan to write some code as you read the book, this package will greatly help your journey. This book is recommended for researchers and students interested in learning how to use R. No prior knowledge of programming, finance or economics is required to take advantage of this book. After finishing, the reader will have enough knowledge to develop their own scripts autonomously, producing academic documents or data analysis for public and private institutions.

Praise for Holy Smokes! "Fr. Riehle was a good friend and integral part of my teams'

successes, including two national football championships. Paul Dykewicz's well-researched and enjoyable book highlights his valuable contributions. You'll discover in these pages how fun, faith and effort can lead to happiness and success." -Ara Parseghian, Notre Dame football coach, 1964-1974; Won 1966 and 1973 national titles "Paul Dykewicz entertainingly captures the wisdom and guidance that Notre Dame's legendary sports chaplain offered for decades to athletes, coaches, students and so many others. Fr. Riehle served as a master motivator, a calming influence and a rock-like spiritual presence to help turn obstacles into opportunities." -Joe Theismann, quarterbacked Notre Dame and Super Bowl-winning Washington Redskins "A HUGE thank you and God bless you to Paul Dykewicz for inviting me to reminisce about Fr. Riehle in his book. Fr. Riehle was one of the coolest priests I have had the pleasure of knowing. He was also an essential cornerstone in my Notre Dame experience. His divine insight and real life experience were critical in helping me navigate the silent battles that often come with sudden fame at a young age. For this I am eternally grateful! You are going to enjoy this book and will be encouraged by the stories it brings to life about one of God's favorite sons... Fr. Riehle." -Raghib "Rocket" Ismail, a

receiver and kick returner at Notre Dame and in the NFL "Paul Dykewicz impressively finds inspiring, calming and spirit-filled modern-day parables to share through the life and guidance of Notre Dame's championship chaplain." -Reggie Brooks, a former Notre Dame running back who rushed for 1,063 yards as NFL rookie "Fr. Riehle was a true Notre Dame man in every sense of the word. Paul Dykewicz's book uniquely captures Fr. Riehle's wit and wisdom and the impact he had on Notre Dame and its people." -Mike Brey, Notre Dame's basketball coach, 2000-Present "The amusing and compelling stories shared by Paul Dykewicz highlight the legacy of a special priest who served as a spiritual leader for more than 40 years at Notre Dame. I am among those fortunate enough to have known Fr. Riehle as a faithful friend, astute adviser, inspirational homilist and source of good-natured humor." -Richard "Digger" Phelps, former Notre Dame basketball coach, 1971-1991 "Paul Dykewicz's book about Fr. Riehle's life and his impact on the athletes at Notre Dame shows the many levels of spirituality, integrity and leadership that can happen when faith and sports unite in a healthy and sensible way. Dykewicz's telling of Riehle's story is a welcomed voice among the screaming voices and commentaries that we hear about our faith leaders and sports heroes

these days. The book is a sweet reminder that each of us, like Fr. Riehle, has the ability to make a difference in the lives of others." -Paula McGee, PhD, an ordained minister and winner of two NCAA women's basketball titles "This book is ready for prime time, baby! Fr. Riehle was as special as they come." -Dick Vitale, ESPN basketball analyst Author Bio: Paul Dykewicz is a seasoned beat reporter, editor, columnist and commentator who has worked for a variety of local and national news organizations. Sears McGraw Hill Professional

This survey examines the vibrant academic literature on environmental, social, and governance (ESG) investing. While there is no consensus on the exact list of ESG issues, responsible investors increasingly assess stocks in their portfolios based on nonfinancial data on environmental impact (e.g., carbon emissions), social impact (e.g., employee satisfaction), and governance attributes (e.g., board structure). The objective is to reduce exposure to investments that pose greater ESG risks or to influence companies to become more

sustainable. One active area of research at present involves assessing portfolio risk exposure to climate change. This literature review focuses on institutional investors, which have grown in importance such that they have now become the largest holders of shares in public companies globally. Historically, institutional investors tended to concentrate their ESG efforts mostly on corporate governance (the "G" in ESG). These efforts included seeking to eliminate provisions that restrict shareholder rights and enhance managerial power, such as staggered boards, supermajority rules, golden parachutes, and poison pills. Highlights from this section: · There is no consensus on the exact list of ESG issues and their materiality. · The ESG issue that gets the most attention from institutional investors is climate change, in particular their portfolio companies' exposure to carbon risk and "stranded assets." · Investors should be positioning themselves for increased regulation, with the regulatory agenda being more ambitious in the European Union than in the United States. Readers might come away from this survey skeptical about the potential for ESG

investing to affect positive change. I prefer to characterize the current state of the literature as having a "healthy dose of skepticism," with much more remaining to be explored. Here, I hope the reader comes away with a call to action. For the industry practitioner, I believe that the investment industry should strive to achieve positive societal goals. CFA Institute provides an exemplary case in its Future of Finance series (www.cfainstitute.org/research/future-finance). For the academic community, I suggest we ramp up research aimed at tackling some of the open questions around the pressing societal goals of ESG investing. I am optimistic that practitioners and academics will identify meaningful ways to better harness the power of global financial markets for addressing the pressing ESG issues facing our society. The Hydraulic Troubleshooting Handbook

The conventional wisdom on how technology will change the future is wrong. Mark Mills lays out a radically different and optimistic

vision for what's really coming. The mainstream forecasts fall into three camps. One considers today as the "new normal," where ordering a ride or food on a smartphone or trading in bitcoins is as good as it's going to get. Another foresees a dystopian era of widespread, digitally driven job- and business-destruction. A third believes that the only technological revolution that matters will be found with renewable energy and electric cars. But according to Mills, a convergence of technologies will instead drive an economic boom over the coming decade, one that historians will characterize as the "Roaring 2020s." It will come not from any single big invention, but from the confluence of radical advances in three primary technology domains: microprocessors, materials, and machines. Microprocessors are increasingly embedded in everything. Materials, from which everything is built, are emerging with novel, almost magical capabilities. And machines, which make and move all manner of stuff, are undergoing a complementary transformation. Accelerating and enabling all of this is the Cloud, history's biggest infrastructure, which is itself based on the building blocks of next-generation microprocessors and artificial intelligence. We've seen this pattern before. The technological revolution that drove the great

economic expansion of the twentieth century can be traced to a similar confluence, one that was first visible in the 1920s: a new information infrastructure (telephony), new machines (cars and power plants), and new materials (plastics and pharmaceuticals). Single inventions don't drive great, long-cycle booms. It always takes convergent revolutions in technology's three core spheres—information, materials, and machines. Over history, that's only happened a few times. We have wrung much magic from the technologies that fueled the last long boom. But the great convergence now underway will ignite the 2020s. And this time, unlike any previous historical epoch, we have the Cloud amplifying everything. The next long boom starts now.
