This individual Shop Manual is one unit of a series on agricultural wheel type tractors. Contained in it are the necessary specifications and the brief but terse procedural data needed by a mechanic when repairing a tractor on which he has had no previous actual experience. The material is arranged in a systematic order beginning with an index which is followed immediately by a Table of Condensed Service

Specifications. These specifications include dimensions, fits, clearances and timing instructions. Next in order of arrangement is the procedures section. In the procedures section, the order of presentation starts with the front axle system and steering and proceeds toward the rear axle. The last portion of the procedures section is devoted to the power take-off and power lift systems.

Interspersed where needed in this section are additional tabular specifications pertaining to wear limits, torquing, etc. John Deere Shop Manual 1020 1520 1530 2020+ Models 655, 755, 756, 855, 856, 955 John Deere 135 Lawn and Garden Tractor Technical Service Repair Manual John Deere Onan Engine P218G Technical Service Repair Manual John Deere Onan Engine 20 HP
