Well done! - Review of John Deere Engine Works Tour ...

April 2, 2018. SHARE.
Defying strong agricultural industry trends for more powerful machines, John Deere built two-cylinder tractors in the United States from 1918-1960. Two-cylinder production even continued for several additional years in South America. The Waterloo Boy Model "N" was

Deere's first two-cylinder, kerosene-powered tractor, a product of the company's 1918 acquisition of the Waterloo Gasoline Engine Company.

Many engine manufacturers made hit-and-miss engines during their peak use—from approximately 1910 through the early 1930s when more modern designs began to replace them. Some of the largest engine manufacturers were Stover, Hercules, International Harvester (McCormick Deering), John Deere (Waterloo Engine Works), Maytag and Fairbanks

Morse.

The 2,550-pound M was powered by a 100.54-cubic-inch two-cylinder gas or all-fuel engine making 20.54 horsepower. With its four-speed transmission, the rubber-tire standard version was capable of 12 MPH.

Early in 1949, Deere sought to outflank Ford by adding the MT for row crop work, as well as the MC crawler.

John Deere Engine Works Tour (Waterloo) - All You Need to ...

My husband and I love to visit and take tours of the John Deere factories. This time it ' s the Engine works

tour. We visited on a Monday morning and started our tour at 9:30. We started with a movie and talk by one of our guides. We were given safety glasses and an I-D badge before we got onto a cart to be driven around the factory. So
