THE MOTOR WORKS - Your Late Model John Deere Experts

April 2, 2018. SHARE. Defying strong agricultural industry trends for more powerful machines, John Deere built two-cylinder tractors in the United States from 1918-1960. Two-cylinder production even continued for several additional years in South America. The Waterloo Boy Model "N" was Deere's first two-cylinder, kerosene-powered tractor, a product of the company's 1918 acquisition of the Waterloo Gasoline Engine Company.

John Deere - Wikipedia

The John Deere Vermilion Works was located at North Sixth Ave., Hoopston, Illinois, where 140 employees were listed as making iron work and implement parts. Moline, with 42,705 residents in 1962, had the local 7,000 employees of John Deere represent 16% of the city's entire population.

NEW Vtg 1980's JOHN DEERE ENGINE WORKS KNIFE Swiss Army ...

Many engine manufacturers made hit-and-miss engines during their peak use—from approximately 1910 through the early 1930s when more modern designs began to replace them. Some of the largest engine manufacturers were Stover, Hercules, International Harvester (McCormick Deering), John Deere (Waterloo Engine Works), Maytag and Fairbanks Morse.

Hit-and-miss engine - Wikipedia

The 2,550-pound M was powered by a 100.54-cubic-inch two-cylinder gas or all-fuel engine making 20.54 horsepower. With its four-speed transmission, the rubber-tire standard version was capable of 12 MPH. Early in 1949, Deere sought to outflank Ford by adding the MT for row crop work, as well as the MC crawler.
