discusses sector investment  
programs (SIPs) as an  
alternative way of financing  
development in Sub-Saharan  
Africa in order to address the  
shortcomings of past  
investment lending in the  
region. The report examines  
the nature and features of SIPs  
by drawing on the limited  
experience with such  
operations in a number of  
countries to date, including  
Bangladesh, Mozambique,  
Pakistan, Tanzania, and  
Zambia. A SIP is distinguished  
by its comprehensive sector  
coverage, by close  
coordination among all  
parties, including stakeholders  
and donors, and by the  
requirement that it be  
formulated under local

As the European Union (EU)  
launches its common currency  
(the Euro), Central European  
(CE) nations are searching for  
best practices in public liability  
management in order to smooth  
their integration into the EU.  
This work addresses that  
concern, examining borrowing  
policies, institution building,  
portfolio optimization, and the  
implications of the Euro and EU  
accession for public debt  
management. To help the CE  
countries achieve their goals, the  
World Bank and the European  
Commission held a two-day  
seminar in Brussels in mid-  
December 1997. European  
Union Accession presents the

papers delivered at that seminar which was attended by all ten EU applicant countries: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, the Slovak Republic, and Slovenia. The workshop pursued the following goals: 1. to investigate the implications of the launch of the Euro and of the EU accession on fiscal prudence and on the borrowing strategies of CE countries; 2. to facilitate the dissemination of the best public liabilities management techniques developed worldwide; and 3. to explore plausible arrangements to promote prudent public liabilities management in Central Europe through a regional expertise network.

This book is a "MUST READ" for those who are planning to build a horse barn/farm, those who are just dreaming of some day building one, those on a limited budget, those on a limitless budget (because you will still have to give direction to your planners and architects to make sure you wind up with a functional barn/farm, and the one you wanted), those

looking to buy an existing farm, those of you boarding, and anyone who rides or is thinking about riding (because the horse's housing and care will contribute to the horse's overall temperament and ability to perform). The author offers hard facts and information from her real life experience building and operating her own horse farm and her more than twenty years of horse ownership and hunter/jumper show competition. Anecdotal stories and "lessons" (epiphanies) are included to emphasize points to help readers avoid making mistakes in their own barn/farm construction projects.
