When Mehula begins to see a stranger invade her privacy, it sets off a chain of events that brings her estranged husband

Sanjay back into her life. But gradually matters spiral out of control as she starts losing her perspective. Their teenage daughter Sona refuses to get bogged down by the turn of events and unwittingly inspires her father to re-evaluate their lives and look forward to the future with renewed hope. Meanwhile, living in the same city, Mehula's childhood friend Priya is fighting her own demons. Repeatedly raped by her music teacher when she was a teenager, Priya tries to draw solace in her job as a sports instructor at a reputed school in Mumbai. But a visit to her childhood city Kolkata on a professional assignment forces her to confront her violent past in a manner that pushes her once again into a deep abyss – but deliverance comes from the most unexpected quarter. Set against the backdrop of a rapidly changing society, Hard Rains examines issues of companionship, disenchantment, retribution, reconciliation and loss – making it both universal and topical.

With unprecedented attention on global change, the current debate revolves around the availability and sustainability of natural resources and how to achieve equilibrium between what society demands from natural environments and what the natural resource base can provide. A full understanding of the range of issues, from the consequences of the changing resource bases to the degradation of ecological integrity and the sustainability of life, is crucial to the process of developing solutions to this complex challenge. Authored by world-class scientists and scholars, The Encyclopedia of Natural Resources provides an authoritative reference on a broad spectrum of topics such as the forcing factors and habitats of life; their histories, current status, and future trends; and their societal connections, economic values, and management. The content presents state-of-the-art science and technology development and perspectives of resource management. Written and designed with a broad audience in mind, the entries clearly elucidate the issues for readers at all levels without sacrificing the scientific rigor required by professionals in the field. Volume I – Land includes 98 entries that cover the topical areas of renewable and nonrenewable natural resources such as forest and vegetative; soil; terrestrial coastal and inland wetlands; landscape structure and function and change; biological diversity; ecosystem services, protected areas, and management; natural resource economics; and resource security and sustainability. Natural

resources represent such a broad scope of complex and challenging topics that a reference book must cover a vast number of subjects in order to be titled an encyclopedia. The Encyclopedia of Natural Resources does just that. The topics covered help you face current and future issues in the maintenance of clean air and water as well as the preservation of land resources and native biodiversity.

We are living in an age when 'nature' seems to be on the brink of extinction yet, at the same time, 'nature' is becoming increasingly ubiquitous and unstable as a category for representation and debate. Future natural brings together leading theorists of culture and science to discuss the concept of 'nature' - its past, present and future. Contributors discuss the impact on our daily life of recent developments on biotechnologies, electronic media and ecological politics. Increasingly, scientific theories and models have been taken up as cultural metaphors that have material effects in transforming 'ways of seeing' and 'structures of feeling'. The book addresses the issue of whether political and cultural debates about the body and environment can take place without reference to 'nature' or the 'natural'. This collection considers how we might 'think' a future developing from emergent scientific theories and discourses. What cultural forms may be produced when new knowledges challenge and undermine traditional ways of conceiving the 'natural'.

Presenting sufficient theory to ensure a sound understanding of basic concepts, this progressive book provides a fundamental, yet comprehensive exploration of total quality management (TQM) in an all-encompassing, single-volume review that covers not only the principles and practices, but also the tools and techniques. The volume covers principles and practices of quality management, and outlines tools and techniques such as benchmarking, information technology, quality management systems, environmental management systems, quality function deployment, quality by design, products liability, process control and Taguchi's quality

engineering. For quality management professionals and trainers.

Peter Lombard and the Sacramental System Harlequin "General Chemistry: Atoms First," Second Edition starts from the building blocks of chemistry, the atom, allowing the authors to tell a cohesive story that progresses logically through molecules and compounds to help students intuitively follow complex concepts more logically. This unified thread of ideas helps students build a better foundation and ultimately gain a deeper understanding of chemical concepts. Students can more easily understand the microscopic-to-macroscopic connections between unobservable atoms and the observable behavior of matter in daily life, and are brought immediately into real chemistry instead of being forced to memorize facts. Reflecting a true atoms first perspective, the Second Edition features experienced atoms-first authors, incorporates recommendations from a panel of atoms-first experts, and follows historical beliefs in teaching chemistry concepts based and real experimental data first. This approach distinguishes this text in the market based whereby other authors teach theory first, followed by experimental data.

Will you find Mr. Right? Or Mr. Still-Lives-With-His-Mother? In Night of a Thousand Boyfriends, you're going to have dinner with a man you've never met. It could be the perfect blind date—but the road to romance is fraught with danger: torn stockings, obnoxious roommates, maxed-out ATM cards, adulterous husbands, and worse. Can you surmount these obstacles and find true love? Or will you be alone in bed, remote control in hand, by 9:30? It all depends on the choices YOU make. If you suggest that things are moving a little too fast, turn to page 88. If you insist that Brian run to the drug store for protection, turn to page 67. If you throw caution to the wind and unfasten his belt, turn to page 58. What happens next? That depends on YOU! How does the story end? Only YOU can find out! Best of all, you can read this book again and again until you've had 24 amazing adventures!

Convective Heat Transfer presents an effective approach to teaching convective heat transfer. The authors systematically develop the topics and present them from basic principles. They emphasize

physical insight, problem-solving, and the derivation of basic equations. To help students master the subject matter, they discuss the implementations of the basic equations and the workings of examples in detail. The material also includes carefully prepared problems at the end of each chapter. In this Second Edition, topics have been carefully chosen and the entire book has been reorganized for the best presentation of the subject matter. New property tables are included, and the authors dedicate an entire chapter to empirical correlations for a wide range of applications of single-phase convection. The book is excellent for helping students quickly develop a solid understanding of convective heat transfer.

Webster's Dictionary lists the term showman as "a notably spectacular, dramatic, or effective performer." In the art of drag racing, Hubert Platt checked all boxes. Known as the "Georgia Shaker," Platt cut his motoring teeth on the long straightaways and twisty back roads of South Carolina while bootlegging moonshine. After a run-in with the law in 1958, Platt transferred his driving skills from illegal activity to sanctioned drag racing and began one of the most dominant runs in drag racing history until his retirement in 1977. After stints in 1957, 1938, and 1962 Chevrolets, Platt's next ride was a Z11 Impala, which carried his first "Georgia Shaker" moniker. Once Chevrolet pulled out of sanctioned racing, Platt found a new home with Ford for 1964 and remained there until he hung up his helmet. Some of the cars he campaigned became icons in their own right. His factory-backed and personal machines included a 1963 Z11 Impala, 1964 Thunderbolt, 1965 Falcon, 1966 Mustang Funny Car, 1967 Fairlane 427, 1968-1/2 Cobra Jet, 1969 CJ Mustang, 1970 427 SOHC Mustang, and 1970 Boss 429 Maverick. A 1986 NHRA Hall of Fame member, Platt's lasting legacy on the sport can't be denied. Whether he was launching his Falcon with the door open, conducting a Ford Drag Team seminar, or posting low E.T. at the 1967 US Nationals in his Fairlane, Platt's imprint on drag racing was all-encompassing. His son and biggest fan, Allen Platt, shares his dad's iconic career in, Hubert Platt: Fast Fords of the "Georgia Shaker"!
