NEW YORK TIMES BESTSELLER Detective Jane Rizzoli and medical examiner Maura Isles are back—and they ' re going into the wild to find a killer. Die Again is the latest heart-pounding thriller in Tess Gerritsen ' s bestselling series, the inspiration behind TNT ' s hit show Rizzoli & Isles. When Boston homicide detective Jane Rizzoli and medical examiner Maura Isles are summoned to a crime scene, they find a killing worthy of the most ferocious beast—right down to the claw marks on the corpse. But only the most sinister human hands could have left renowned big-game hunter and taxidermist Leon Gott gruesomely displayed like the once-proud animals whose heads adorn his walls. Did Gott unwittingly awaken a predator more dangerous than any he ' s ever hunted? Maura fears that this isn ' t the killer ' s first slaughter, and that it won ' t be the

last. After linking the crime to a series of unsolved homicides in wilderness areas across the country, she wonders if the answers might actually be found in a remote corner of Africa. Six years earlier, a group of tourists on safari fell prey to a killer in their midst. Marooned deep in the bush of Botswana, with no means of communication and nothing but a rifle-toting guide for protection, the terrified tourists desperately hoped for rescue before their worst instincts—or the wild animals prowling in the shadows—could tear them apart. But the deadliest predator was already among them, and within a week, he walked away with the blood of all but one of them on his hands. Now this killer has chosen Boston as his new hunting ground, and Rizzoli and Isles must find a way to lure him out of the shadows and into a cage. Even if it means dangling the bait no hunter can resist: the one victim who got away. Advance praise for Die Again “ With Die Again, Tess Gerritsen proves that she is still at the top of her game. I love this fantastically gripping story and can ' t wait for more. ” —Karin Slaughter “ Tess Gerritsen always delivers, and this is Gerritsen at her dark, addictive best. What gives Die Again its peculiar charge is the idea, never far from the surface, that we humans are predatory animals like any other. Perhaps we should not be so surprised to find hunters among us. ” —William Landay “ Animal instinct turns savage—and man is an animal. A Rizzoli and Isles thriller is a guaranteed great read, but this time out Gerritsen really brings on the scary! ” —Sandra Brown “ Tess Gerritsen once again proves her masterful dominance in stories delving into the criminal mind and forensic sciences. Die Again left me breathless as Rizzoli and Isles investigate a horrific murder, one with ties to an unsolved massacre in years past. Here is a story both harrowing and as intellectually sharp as a dagger ' s edge. I dare you to try to stop reading this once you ' ve started. ” —James Rollins “ Harrowing! Seamlessly melding the gritty streets of Boston with the golden plains of Africa, Tess Gerritsen sets up a cunning predator who ' s spent years perfecting his game. Now enter Rizzoli and Isles, two of Boston ' s best determined to catch one of the world ' s worst in a battle of wits where only the strong can survive. This is Tess Gerritsen at her finest! ” —Lisa Gardner

The Apprentice: A Rizzoli & Isles Novel Chronicle Books

This handbook is the most comprehensive and interdisciplinary work on marine conservation and fisheries management ever compiled. It is the first to bridge fisheries and marine conservation issues. Its innovative ideas, detailed case studies, and governance framework provide a global special perspective over time and treat problems in the high seas, community fisheries, industrial fishing, and the many interactions between use and non-use of the oceans. Its policy tools and ideas for overcoming the perennial problems of over fishing, habitat and biodiversity loss address the facts that many marine ecosystems are in decline and plagued by overexploitation due to unsustainable fishing practices. An outstanding feature of the book is the detailed case-studies on conservation practice and fisheries management from around the world. These case studies are combined with 'foundation' chapters that provide an overview of the state of the marine world and innovative and far reaching perspectives about how we can move forward to face present and future challenges. The contributors include the world's leading fisheries scientists, economists, and managers. Ecosystem and incentive-based approaches are described and complemented by tools for cooperative, participatory solutions. Unique themes treated: fisher behavior and incentives for management beyond rights-based approaches; a synthesis of proposed 'solutions'; a framework for understanding and overcoming the critical determinants of the decline in fisheries, degradation of marine ecosystems, and poor socio-economic performance of many fishing communities; models for innovative policy instruments; a plan of action and adoption pathways to promote sustainable fishing practices globally. Collectively, the handbook's many valuable contributions offer a way forward to both understanding and resolving the multifaceted problems facing the world's oceans.

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. "Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were

written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features a discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

Oceans account for 50% of the anthropogenic CO2 released into the atmosphere. During the past 15 years an international programme, the Joint Global Ocean Flux Study (JGOFS), has been studying the ocean carbon cycle

to quantify and model the biological and physical processes whereby CO₂ is pumped from the ocean's surface to the depths of the ocean, where it can remain for hundreds of years. This project is one of the largest multi-disciplinary studies of the oceans ever carried out and this book synthesises the results. It covers all aspects of the topic ranging from air-sea exchange with CO₂, the role of physical mixing, the uptake of CO₂ by marine algae, the fluxes of carbon and nitrogen through the marine food chain to the subsequent export of carbon to the depths of the ocean. Special emphasis is laid on predicting future climatic change.

This has led to widespread interest in using natural materials—straw, cob, and earth—for building homes and other buildings that are inexpensive, and that rely largely on labor rather than expensive and often environmentally-damaging outsourced materials. Earthbag Building is the first comprehensive guide to all the tools, tricks, and techniques for building with bags filled with earth—or earthbags. Having been introduced to sandbag construction by the renowned Nader Khalili in 1993, the authors developed this "Flexible Form Rammed Earth Technique" over the last decade. A reliable method for constructing homes, outbuildings, garden walls and much more, this enduring, tree-free architecture can also be used to create arched and domed structures of great beauty—in any region, and at home, in developing countries, or in emergency relief work. This profusely illustrated guide first discusses the many merits of earthbag construction, and then leads the reader through the key elements of an earthbag building: Special design considerations Foundations, walls, and floors Electrical, plumbing, and shelving Lintels, windows and door installations Roofs, arches and domes Exterior and interior plasters. Jane Rizzoli and Maura Isles—the inspiration for the hit TNT series—continue their crime-solving streak. The bestselling author of The Surgeon returns—and so does that chilling novel's diabolical villain. Though held behind bars, Warren Hoyt still haunts a helpless city, seeming to bequeath his evil legacy to a student all-too-diligent . . . and all-too-deadly. It is a boiling hot Boston summer. Adding to the city's woes is a series of shocking crimes, in which wealthy men are made to watch while their wives are brutalized. A sadistic demand that ends in abduction and death. The pattern suggests one man: serial killer Warren Hoyt, recently removed from the city's streets. Police can only assume an acolyte is at large, a maniac basing his attacks on the twisted medical techniques of the madman he so admires. At least that's what Detective Jane Rizzoli thinks. Forced again to confront the killer who scarred her—literally and figuratively—she is determined to finally end Hoyt's awful influence . . . even if it means receiving more resistance from her all-male homicide squad. But Rizzoli isn't counting on the U.S. government's sudden interest. Or on meeting Special Agent Gabriel Dean, who knows more than he will tell. Most of all, she isn't counting on becoming a target herself, once Hoyt is suddenly free, joining his mysterious blood brother in a vicious vendetta. . . . Filled with superbly created characters—and the medical and police procedural details that are her trademark—The Apprentice is Tess Gerritsen at her brilliant best. Set in a stunning world where evil is easy to learn and hard to end, this is a thriller by a master who could teach other authors a thing or two.
