sustainability. Papers presented on  
BNF in crop forage and tree legumes  
are augmented with discussion of  
integrated farming systems involving  
BNF, soil and N management, and  
recycling of legume residues. BNF by  
non-legumes is discussed and attempts  
to transform cereals into nodulating  
plants are critically reviewed. Also  
described are advances in the  
development of new methodologies to

In *Sleuthing the Alamo*, historian James E. Crisp draws back the curtain on years of mythmaking to reveal some surprising truths about the Texas Revolution--truths often obscured by both racism and

"political correctness," as history has been hijacked by combatants in the culture wars of the past two centuries. Beginning with a very personal prologue recalling both the pride and the prejudices that he encountered in the Texas of his youth, Crisp traces his path to the discovery of documents distorted, censored, and ignored--documents which reveal long-silenced voices from the Texan past. In each of four chapters focusing on specific documentary "finds," Crisp uncovers the clues that led to these archival discoveries. Along the way, the cast of

creativity. It is what helps distinguish one culture from another. Although folklore is so much a part of our daily lives, we often lose sight of just how integral it is to everything we do. If we look for it, we can find folklore in places where we'd never think it existed. Folklore: In All of Us, In All We Do includes articles on a variety of topics. One chapter looks at how folklore and history complement one another; while historical records provide facts about dates, places and names, folklore brings those events and people to life by making them relevant to us. Several articles examine the cultural roles women fill. Other articles feature folklore of particular groups, including oil field workers, mail carriers, doctors, engineers, police officers, horse traders, and politicians. As a follow-up article to Inside the Classroom (and Out), which focused on folklore in education, there is also an article on how teachers can use writing in the classroom as a means of keeping alive the storytelling tradition. The Texas Folklore Society has been collecting and preserving folklore since its first publication in 1912. Since then, it has published or assisted in the publication of nearly one hundred books on Texas folklore. *Our Farm and Building Book* Alpha Edition The fascinating and sometimes horrifying story of Aborigines in

"Why don't you come up and see me sometime?" Mae West invited and promptly captured the imagination of generations. Even today, years after her death, the actress and author is still regarded as the pop archetype of sexual wantonness and ribald humor. But who was

this saucy starlet, a woman who was controversial enough to be jailed, pursued by film censors and banned from the airwaves for the revolutionary content of her work, and yet would ascend to the status of film legend? Sifting through previously untapped sources, author Jill Watts unravels the enigmatic life of Mae West, tracing her early years spent in the Brooklyn subculture of boxers and underworld figures, and follows her journey through burlesque, vaudeville, Broadway and, finally, Hollywood, where she quickly

in 2003. Assisted conception is  
an area where it often seems  
that all the ethical and legal  
issues have been covered and  
then technology advances and  
the discussions start all over  
again. The book is an anthology

---

of papers presented during a project looking at thearaputic research in assisted conception (TRAC). It is divided into three areas addressing research, ethics and law. Each chapter begins with an overview of the issues, with the aim being to present new perspectives rather than covering old ground. The European Convention on Human rights and Biomedicine came into force on December 1, 1999. The Convention allows thearaputic research and research on spare embryos but forbid fundamental research, which may be essential to the safe development of new techniques. This also means that people may become part of an experimental process without their consent. The project brings together clinicians, embryologists, lawyers and ethicists to ascertain whether there might be a risk of infertility patients being exposed to insufficiently tested procedures and to see if there is a need for fundamental research in this area. It also looks at the legislative safeguards that exist and whether a European standard for treatment should be set.

This book deals with the principles, concepts, technology, potential, limitations and impacts of various non-chemical weed management options. It contains 12 chapters discussing topics on prevention strategies in weed management, exploitation of weed crop interactions to manage weed problems, cultural methods, cover crops, allelopathy, classical biological control using phytophagous arthropods, bioherbicides (such as mycoherbicides), mechanical weed control, non-living mulches, thermal weed control and soil solarization.

NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered

---

inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores:

- Does sex actually sell?
- Does subliminal advertising still surround us?
- Can “cool” brands trigger our mating instincts?
- Can our other senses—smell, touch, and sound—be aroused when we see a product?

Buyology is a fascinating and shocking journey into the mind of today's

consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Hemp is enjoying a worldwide resurgence. This book combines a useful review of the hemp pest and disease literature published over the past 50 years, with up-to-date information on modern biological control techniques. Each pest and disease organism is presented

---

in the same format, covering range and economic impact, symptoms, life history, diagnosis, and both new and old techniques for biological control and chemical control. Easy to use keys are included for rapid identification of the most common pests. Introductory chapters describe the general principles of plant protection, requirements for healthy plant growth, and taxonomy of parasites and pathogens.

Science is to provide a forum for leading scientists to analyze and summarize the available scientific information on a subject, assessing its importance and identifying additional research needs. A wide array of subjects has been addressed by authors from many countries in the initial ten volumes of the series. The quick acceptance of the series by both authors and readers has been very gratifying and confirms our perception that a need did exist for a medium to fill the gap between the scientific journals and the comprehensive reference books. This volume is the first of the series devoted entirely to a single topic soil degradation. Future volumes will include both single-

---

topic volumes as well as volumes containing reviews of different topics of soil science, as in the case of the first ten volumes. There are increasing concern and attention about managing natural resources, particularly soil and water. Soil degradation is clearly one of the most pressing problems facing mankind. Although the spotlight regarding soil degradation in recent years has focused on Africa, concern about the degradation of soil and water resources is worldwide. The widespread concern about global environmental change is also being linked to severe problems of soil degradation. Therefore, we are indeed pleased that the first volume of the series devoted to a

single topic addresses such an important issue. The current volume is also the first of the series involving a guest editor.

The demise of state Socialisms caused radical social, cultural and economic changes in Eastern Europe. Since then, young people have been confronted with fundamental disruptions and transformations to their daily environment, while an unsettling, globalized world substantially reshapes local belongings and conventional values. In times of multiple instabilities and uncertainties, this volume

---

argues, young people prefer to try to adjust to given circumstances than to adopt the behaviour of potential rebellious, adolescent role models, dissident counter-cultures or artistic breakings of taboo. Eastern European Youth Cultures in a Global Context takes this situation as a starting point for an examination of generational change, cultural belongings, political activism and everyday practices of young people in different Eastern European countries from an interdisciplinary perspective. It argues that the conditions of global change not only call for a differentiated evaluation of youth cultures, but also for a revision of our understanding of 'youth' itself - in Eastern Europe and beyond.
