An Illustrated Dictionary for the Modern Trombone, Tuba, and Euphonium Player Lincoln Florence loved her mother's piano playing and wanted to be just like her. When she was just four years old she played her first piano concert and as she grew up she studied and wrote music hoping one day to hear her own music performed by an orchestra. This is the story of a brilliant musician who prevailed against race and gender prejudices to become the first Black woman to be recognised as a symphonic composer and be performed by a major American orchestra in 1933.

With the release of Avatar in December 2009, James Cameron cements his reputation as king of sci-fi and blockbuster filmmaking. It ' s a distinction he ' s long been building, through a directing career that includes such cinematic landmarks as The Terminator, Aliens, The Abyss, and the highest grossing movie of all time, Titanic. The Futurist is the first in-depth look at every aspect of this audacious creative genius—culminating

---

in an exclusive behind-the-scenes glimpse of the making of Avatar, the movie that promises to utterly transform the way motion pictures are created and perceived. As decisive a break with the past as the transition from silents to talkies, Avatar pushes 3-D, live action, and photo-realistic CGI to a new level. It rips through the emotional barrier of the screen to transport the audience to a fabulous new virtual world. With cooperation from the often reclusive Cameron, author Rebecca Keegan has crafted a singularly revealing portrait of the director ' s life and work. We meet the young truck driver who sees Star Wars and sets out to learn how to make even better movies himself—starting by taking apart the first 35mm camera he rented to see how it works. We observe the neophyte director deciding over lunch with Arnold Schwarzenegger that the ex-body builder turned actor is wrong in every way for the Terminator role as written, but perfect regardless. After the success of The Terminator, Cameron refines his special-effects wizardry with a big-time Hollywood budget in the creation of the relentlessly exciting Aliens. He builds an immense underwater set for The Abyss in the massive containment vessel of an abandoned nuclear power plant—where he pushes his scuba-breathing cast to and sometimes past their physical and emotional breaking points (including a

---

white rat that Cameron saved from drowning by performing CPR). And on the set of Titanic, the director struggles to stay in charge when someone maliciously spikes craft services' mussel chowder with a massive dose of PCP, rendering most of the cast and crew temporarily psychotic. Now, after his movies have earned over \$5 billion at the box office, James Cameron is astounding the world with the most expensive, innovative, and ambitious movie of his career. For decades the moviemaker has been ready to tell the Avatar story but was forced to hold off his ambitions until technology caught up with his vision. Going beyond the technical ingenuity and narrative power that Cameron has

long demonstrated, Avatar shatters old cinematic paradigms and ushers in a new era of storytelling. The Futurist is the story of the man who finally brought movies into the twenty-first century.

From the moment the battle ended, Gettysburg was hailed as one of the greatest triumphs of the Union army. Celebrations erupted across the North as a grateful people cheered the victory. But Gabor Boritt turns our attention away from the rejoicing millions to the dark mood of the White House--where Lincoln cried in frustration as

---

General Meade let the largest Confederate army escape safely into Virginia. Such unexpected portraits abound in *Lincoln's Generals*, as a team of distinguished historians probes beyond the popular anecdotes and conventional wisdom to offer a fascinating look at Lincoln's relationship with his commanders. In *Lincoln's Generals*, Boritt and his fellow contributors examine the interaction between the president and five key generals: McClellan, Hooker, Meade, Sherman, and Grant. In each chapter, the authors provide new insight into this mixed bag of officers and the president's tireless efforts to work with them. Even Lincoln's choice of generals was not as ill-starred as we think, writes Pulitzer Prize-winner Mark E. Neely, Jr.: compared to most Victorian-era heads of state, he had a fine record of selecting commanders (for example, the contemporary British gave us such bywords for incompetence as "the charge of the Light Brigade," while Napoleon III managed to lose the entire French army). But the president's relationship with his generals was never easy. In these pages, Stephen Sears underscores McClellan's perverse obstinacy as Lincoln tried everything to drive him ahead. Neely sheds new light on the

---

president's relationship with Hooker, arguing that he was wrong to push the general to attack at Chancellorsville. Boritt writes about Lincoln's prickly relationship with the victor of Gettysburg, "old snapping turtle" George Meade. Michael Fellman reveals the political stress between the White House and William T. Sherman, a staunch conservative who did not want blacks in his army but who was crucial to the war effort. And John Y. Simon looks past the legendary camaraderie between Lincoln and Grant to reveal the tensions in their relationship. Perhaps no other episode has been more pivotal in the nation's history than the Civil War--and yet so much of these massive events turned on a few distinctive personalities. Lincoln's Generals is a brilliant portrait that takes us inside the individual relationships that shaped the course of our most costly war.
