The E-Type Jaguar has been described on countless occasions as one of the most beautiful cars in the world. Over the years it has built a reputation amongst Jaguar enthusiasts and classic car collectors for being the ultimate classic to own. If you are lucky enough to own one and are planning to undertake the restoration work by yourself, this manual will take you through the full nut-and-bolt restoration of a very early example, E-Type Jaguar Chassis No 60. Restoration experts from the world's premier Jaguar restoration company, Classic Motor Cars Ltd, have written each chapter, giving you a first-hand account of the process. Contents: Preparing a workspace and dismantling the vehicle; Restoring and painting the body; Engine, electrics and transmission restoration; Assembly of the sub-assemblies, and final assembly; Trimming; Road testing and the first outing. This comprehensive manual for the complete restoration of an E-Type will be of great interest to motoring enthusiasts and motor mechanics, and is superbly illustrated with 700 colour photographs.

American Flying Boats and Amphibious Aircraft Johnson/Evinrude Four-stroke outboard Motor Shop Manual
Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights

a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system
Recovering a database Cloning a set of databases
