The "terrifically good" (The New York Times Book Review) finale in the New York Times bestselling Red Sparrow trilogy continues the dangerous entanglements of Russian counterintelligence chief Dominika Egorova and her lover, CIA agent Nate Nash, on the hunt for a Russian agent working in the US government. Russian president Vladimir Putin is planning the covert assassination of a high-ranking US official with the intention of replacing him with a mole whom Russian intelligence has cultivated for more than fifteen years. Catching wind of this plot, Dominika, Nate, and their CIA colleagues must unmask the traitor before he or she is able to reveal that Dominika has been spying for years on behalf of the CIA. Any leak, any misstep, will expose her as a CIA asset and result in a one-way trip to a Moscow execution cellar. Ultimately, the lines of danger converge on the spectacular billion-dollar presidential palace on the Black Sea during a power weekend with Putin's inner circle. Does Nate sacrifice himself to save Dominika? Does Dominika forfeit herself to protect Nate? Do they go down together? With a plot ripped from tomorrow's headlines, *The Kremlin's Candidate* is "both timely and timeless; an espionage tale that takes the reader behind and beyond the headlines of Russia's assault on America" (Nelson DeMille).

* Outboard motor repair for the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of "cheap power." Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours' work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You'll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair / maintenance information at your fingertips, even when out on your boat.

Fishing for Fairness develops an explicitly cultural perspective on environmental politics in the Philippines by analysing the responses of fishers to marine resource regulations. In the resource frontier of the Calamianes Islands, fishing, conservation and tourism provide the context where competing visions of how to engage with marine resources are played out. The book draws on data from ethnographic fieldwork with fishers, government and NGO officials, fish traders and tourism operators to show how the strategic responses of fishers to management initiatives are couched within particular cultural idioms. Tapping into broader notions of morality in the Philippines, fishers express a discourse that emphasises their poverty and the obligations of the wealthy to treat them with fairness. By deploying this discourse, fishers are able to reframe what are on the surface-questions of environmental management into issues about poverty within particular social relationships. By using a cultural political ecology framework to analyse fishers' responses to regulation, the book emphasises the distinctive ways in which marginalised people in the Philippines resist and reframe resource management initiatives. Fishing for Fairness will appeal to both academics and policy makers interested in marine resource management, political ecology, anthropology and development studies particularly throughout the Asia-Pacific.
