Never Far Away

An award-winning  
scientist offers his  
unorthodox approach to  
childrearing:

“ Parentology is  
brilliant, jaw-droppingly  
funny, and full of  
wisdom...bound to  
change your thinking  
about parenting and its  
conventions ” (Amy  
Chua, author of Battle  
Hymn of the Tiger  
Mother). If you ’ re like  
many parents, you

might ask family and  
friends for advice when  
faced with important  
choices about how to  
raise your kids. You  
might turn to parenting  
books or simply rely on  
timeworn religious or  
cultural traditions. But  
when Dalton Conley, a  
dual-doctorate scientist  
and full-blown nerd,  
needed childrearing  
advice, he turned to  
scientific research to  
make the big decisions.  
In Parentology, Conley  
hilariously reports the

results of those  
experiments, from  
bribing his kids to do  
math (since studies  
show conditional cash  
transfers improved  
educational and health  
outcomes for kids) to  
teaching them impulse  
control by giving them  
weird names (because  
evidence shows kids  
with unique names learn  
not to react when their  
peers tease them) to  
getting a vasectomy  
(because fewer kids in  
a family mean smarter

---

kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the

latest literature on parenting—with lessons that go down easy. You ' ll be laughing and learning at the same time.
