NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES "Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts." —Janice Turner, The Times of London Until just a few years ago, gender dysphoria—severe discomfort in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as "transgender." These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans "influencers." Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and "gender-affirming" educators and therapists who push life-changing interventions on

young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls’ social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier’s essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century, perhaps none can match the deciphering of the human genetic code, both for its technical brilliance and for its implications for our future. In *A Life Decoded*, J. Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today. Here, Venter relates the unparalleled drama of the quest to decode the human genome—a goal he predicted he could achieve years earlier and more cheaply than the government-sponsored Human Genome Project, and one that he fulfilled in 2001. A thrilling story of detection, *A Life Decoded* is also a revealing, and often troubling, look at how science is practiced today.

The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world.

His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The Skeptical Environmentalist offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

Presenting the Proceedings of the Ergonomics Society's annual conference, the series embraces the wide range of topics covered by ergonomics. Individual papers provide insight into current practice, present new research findings and form an invaluable reference source. A wide range of topics are covered in these proceedings, including Ergonomics, Human Factors and User-Centred Design. It also features related disciplines such as Psychology, Engineering and Physiology. Particular emphasis is given to the utility of these disciplines in improving health, safety, efficiency and productivity. The 2007 Annual Conference features "Human factors at the heart of systems engineering". As well as being of interest to mainstream ergonomists and human factors specialists, *Contemporary Ergonomics* will appeal to all those who are concerned with the interaction of people with their working and leisure environment including designers, manufacturing and production engineers, health and safety specialists, occupational, applied and industrial psychologists and applied physiologists.

Voted America's Best-Loved Novel in PBS's *The Great American Read* Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold

more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Critical Thinking for Nursing, Health and Social Care Springer Nature Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Integrated Research Methods In Public Health John Wiley & Sons

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. The Whites of Their Eyes reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore

addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

Tabbner's Nursing Care McGraw Hill Professional

This book provides guidance to readers for how to conduct an integrative review. Over the decades, with the expansion of evidence-based practice (EBP), the evolution of methods used in reviews has resulted in a wide spectrum of review types. Due to the overlapping characteristics of the various review methods, confusion exists related to terminology, descriptions and methods of each type. To fill this gap, this book examines components necessary to conduct a rigorous integrative review from formulating questions through dissemination of the results of the review. Each chapter focuses on one component or step in this process and is written in a straightforward and readable manner. An integrative review is considered by many as an actual research study, hence it should be approached following established research methods involving well-defined steps. The integrative review is often compared with the systematic review. Both are used in healthcare research and follow a systematic process in reviewing literature and developing recommendations, but there are important differences that are addressed in the book. Evidence-based practice (EBP) demands high quality, rigorous evidence for nurse clinicians to make informed decisions with and for their patients. In nursing education, the integrative review is a frequent capstone project for graduate students and forms the basis for many doctoral projects. The Integrative review process should be valid, reliable and transparent and this book provides clear guidelines for writing an integrative review for students, educators, clinicians, and researchers. This book is a useful addition to courses for both undergraduate and graduate level writers of integrative reviews. In academia, a likely adoption would be in graduate research and research methods courses, and baccalaureate honor courses.

With an emphasis on how nursing research is appraised and applied, *Nursing Research: Methods and Critical Appraisal for Evidence-Based Practice*, 8th Edition offers a comprehensive introduction to the nursing research concepts and methods essential to today's evidence-based healthcare environment. Coverage includes clear guidelines for evaluating research and applying scientific evidence to practice, qualitative and quantitative research, appraising and critiquing research, critical thinking, and clinical decision making using research information. The American Journal of Nursing (AJN) Book of the Year Awards recognized the 8th edition with a first-place award in the Nursing Research category. Balanced coverage acquaints you with the processes behind research and evidence-based practice. Distinct coverage of qualitative and quantitative research

approaches are presented in separate parts of the book to avoid the confusion that often results when the two are interwoven. Complete, high-quality research examples, including three sample critiques, demonstrate how to apply the principles outlined in the text to published quantitative and qualitative research studies. Research Vignettes help bridge the gaps among clinical research, academia, and clinical practice. All-star cast of contributors represents a widely respected team of experts in nursing research and evidence-based practice. Each chapter contains a variety of popular learning aids, including Key Terms, Learning Outcomes, Helpful Hints, Evidence-Based Practice Tips, Appraising the Evidence, Critiquing Criteria, Critique of a Research Study, Critical Thinking Decision Paths, Critical Thinking Challenges, and Key Points. NEW! Streamlined steps of the research process focus on how to appraise and apply research findings for evidence-based practice. NEW! Theory chapter features an up-to-date exploration of the most important theories behind nursing research. NEW! Systematic Reviews and Clinical Practice Guidelines chapter addresses this important area of nursing research. NEW! Quality Improvement chapter discusses the trending topic of quality improvement as it relates to nursing research. NEW! Updated research articles, including a Cochrane Collection study, reflect the most current, high-quality studies, particularly those that are accessible and relevant to readers with minimal clinical experience. NEW! All-new Research Vignettes illustrate the dynamic nature of nursing research.

The goal of ICOLLEC 2021 is to provide an academic forum for disseminating diverse scholarly, analytical, and practical perspectives on the tenets and nexuses through interdisciplinary dialog in the realms of humanities, education, and the arts. The topic for this year is "The Dynamics of Language, Literature, Education, Art, and Culture of a Changing Society in the Age of Disruption." We pledge to capture a vivid portrayal and a picturesque sphere for the various cutting-edge phenomena in language, literature, education, art, and culture. While the contributions and passion shown throughout the conference have far surpassed our expectations. As a result, we are overwhelmed with a sense of triumph and enlightenment. It is a great accomplishment for us to present the conference proceedings as the remembrance of the authors and delegates of ICOLLEC 2021 in a permanent record of what was presented. The proceedings are

organized into three sections: language, literature, and culture. We collected 35 remarkable manuscripts in the discussion from around 60 papers presented. Hopefully, you will find it insightful, fascinating, and inspirational. This proceeding also includes two submissions from representatives of notable keynote speakers. For the subtheme in Representation of the Disruption Era in Literature, Prof. Dr. Sharmani Patricia Gabriel has written a piece titled: The Humanities in an Age of Neoliberal Disruption. For the sub-theme of Local Culture in Global Society, Dr. Hippolytus Kewwel, M. Hum., wrote an article entitled: Hermeneutic Dilemma in the Indonesian Interfaith Dialogue Program. Unfortunately, several manuscripts were not accepted due to reviewing results and capacity limits. We would like to extend our sincere gratitude and appreciation to distinguished reviewers for a thorough process in ensuring we obtain exceptional content for manuscripts published in EUDL proceedings. Finally, we would also like to acknowledge, with much appreciation, the organizing committee for their efforts and dedication.
