A captivating literary and historical record, Jean Giono's Occupation Journal offers a glimpse into life in collaborationist France during the Second World War, as seen through the eyes and thoughts of one of France's greatest and most independent writers. Written during the years of France's occupation by the Nazis, Jean Giono's Occupation Journal reveals the inner workings of one of France's great literary minds during one of the country's darkest hours. A renowned writer and committed pacifist throughout the 1930s--a conviction that resulted in his imprisonment before and after the Occupation--Giono spent the war in the village of Contadour in Provence, where he wrote, corresponded with other writers, and cared for his consumptive daughter. This journal records his musings on art and literature, his observations of life, his interactions with the machinery of the collaborationist Vichy regime, as well as his forceful political convictions. Giono recounts the details of his life with fierce independence of thought and novelistic attention to character and dialogue. Occupation Journal is a fascinating historical document as well as a unique window into one of French literature's most voracious and critical minds.

Cici dreams of being a novelist. Her favorite subject: people, especially adults. She 's been watching them and taking notes. Everybody has one special secret, Cici figures, and if you want to write about people, you need to understand what 's hiding inside them. But now she 's discovered something truly strange: an old man who disappears into the forest every Sunday with huge pots of paint in all sorts of colors. What is he up to? Why does he look so sad when he comes back? In a graphic novel interwoven with journal notes, scrapbook pieces, and doodles, Cici assembles clues about the odd and wonderful people she 's uncovered, even as she struggles to understand the mundane: her family and friends.

This book is the first collection of original research to explore links between demographics and media coverage of emerging human rights issues. It covers cross-national reporting on human trafficking, HIV/AIDS, water contamination, and child labour; and same-sex marriage, Guantanamo detainee rights, immigration reform, and post-traumatic stress disorder in the United States. The research asks questions such as: What are the principal catalysts that propel rights issues into media agendas? Why do some surface more quickly than others? And how do the demographics of cross-national reporting differ from those driving multi-city US nationwide coverage of rights claims? Using community structure theory and innovative Media Vector content analysis, the eight chapters of this book reveal three striking patterns that show how differences in female empowerment, social or economic vulnerability, and Midwestern

newspaper geographic location, link powerfully with variations in coverage of rights issues. The patterns connecting demographics and rights claims confirm that coverage of human rights can mirror the concerns of stakeholders and vulnerable groups, contrary to conventional assumptions that media typically serve as "guard dogs" reinforcing the interests of political and economic elites. This book was originally published as a special issue of The Atlantic Journal of Communication.

Subtexts are all around us. In conversation, business transactions, politics, literature, philosophy, and even love, the art of expressing more than what is explicitly said allows us to live and move in the world. But rarely do we reflect on this subterranean dimension of communication. In this book, renowned classicist and scholar of rhetoric Laurent Pernot explores the fascinating world of subtext. Of the two meanings present in any instance of double meaning, Pernot focuses on the meaning that is unstated—the meaning that counts. He analyzes subtext in all its multifarious forms, including allusion, allegory, insinuation, figured speech, irony, innuendo, esoteric teaching, reading between the lines, ambiguity, and beyond. Drawing on examples from figures as varied as Homer, Shakespeare, Molière, Proust, Foucault, and others, as well as from popular culture, Pernot shows how subtext can be identified and deciphered as well as how prevalent and essential it is in human life. With erudition and wit, Pernot explains and clarifies a device of language that we use and understand every day without even realizing it. The Subtle Subtext is a book for anyone who is interested in language, literature, hidden meanings, and the finer points of social relations.

This is an exciting time to be an academic advisor—a time in which global recognition of the importance of advising is growing, research affirms the critical role advising plays in student success, and institutions of higher education increasingly view advising as integral to their missions and essential for improving the quality of students' educational experiences. It is essential that advisors provide knowledgeable, realistic counsel to the students in their charge. The New Advisor Guidebook helps advisors meet this challenge. The first and final chapters of the book identify the knowledge and skills advisors must master. These chapters present frameworks for setting and benchmarking self-development goals and for creating self-development plans. Each of the chapters in between focuses on foundational content: the basic terms, concepts, information, and skills advisors must learn in their first year and upon which they will build over the lengths of their careers. These chapters include strategies, questions, guidelines, examples, and case studies that give advisors the tools to apply this content in their work with students, from demonstrations of how student development theories might play out in advising sessions to questions advisors can ask to become aware of their biases and avoid making assumptions about students to a checklist for improving listening, interviewing, and referral skills. The book covers various ways in which advising is delivered: one-to-one, in groups, and online. The New Advisor Guidebook serves as an introduction to what advisors must know to do their jobs effectively. It pairs with Academic Advising Approaches: Strategies That Teach Students to Make the Most of College, also from NACADA, which presents the delivery strategies successful advisors can use to help students make the most of their college experience.
