#1 NEW YORK TIMES BESTSELLER • The twentieth anniversary edition of the classic story of an incredible group of students and the teacher who inspired them, featuring updates on the students' lives, new journal entries, and an introduction by Erin Gruwell Now a public television documentary, *Freedom Writers: Stories from the Heart* In 1994, an idealistic first-year teacher in Long Beach, California, named

---

Erin Gruwell confronted a room of “unteachable, at-risk” students. She had intercepted a note with an ugly racial caricature and angrily declared that this was precisely the sort of thing that led to the Holocaust. She was met by uncomprehending looks—none of her students had heard of one of the defining moments of the twentieth century. So she rebooted her entire curriculum, using treasured books such as Anne Frank’s diary as her guide to combat intolerance and misunderstanding. Her students began recording their thoughts and feelings in their own diaries, eventually dubbing themselves the “Freedom Writers.” Consisting of powerful entries from the students’ diaries and narrative text by Erin Gruwell, *The Freedom Writers Diary* is an unforgettable story of how hard work, courage, and determination changed the lives of a teacher and her students. In the two decades since its original publication, the book has sold more than one million copies and inspired a major motion picture *Freedom Writers*. And now, with this twentieth-anniversary edition, readers are brought up to date on the lives of the Freedom Writers, as they blend indispensable takes on social issues with uplifting stories of attending college—and watch their own children follow in their footsteps. *The Freedom Writers Diary* remains a vital read for anyone who believes in second chances.

Responding to Literature Corwin

Expanding on the philosophy and methods of *The Laws Guide to Nature Drawing and Journaling*, John Muir Laws and Emilie Lygren have developed the first-ever comprehensive book devoted to helping educators use nature journaling as an inspiring teaching tool to engage young people with wild places. In their workshops Laws and Lygren are often asked the how-tos of teaching nature journaling: how to manage student groups in the outdoors, teach drawing skills (especially from those who profess to have none), connect journaling to educational standards, and incorporate journaling into longer lessons. This book puts together curriculum plans, advice, and in-the-field experience so that educators of all stripes can leap into journaling with their students. The approaches are designed to work in a range of ecosystems and settings, and are suitable for classroom teachers, outdoor educators, camp counselors, and homeschooling parents. Full-color illustrations and sample journal pages from notable naturalists show how to put each lesson into practice. Field-tested by over a hundred educators, this book includes dozens of activities that easily support the Common Core and the Next Generation Science Standards--and, just as important, it will show kids and mentors alike how to recognize the wonder and intrigue in their midst.

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that

---

FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Dear Kids, A long time ago, when you were little, Mom and I took you to where we wanted to build a house. . . . I remember there was one tree, however, that the three of you couldn't stop staring at. . . . After the family spares him from the builders, Steve the tree quickly works his way into their lives. He holds their underwear when the dryer breaks down, he's there when Adam and Lindsay get their first crushes, and he's the centerpiece at their outdoor family parties. With a surprising lack of anthropomorphizing, this is a uniquely poignant celebration of fatherhood, families, love, and change.
