Translation of cognitive representations into written language is one of the most important processes in writing. This volume provides a long-awaited updated overview of the field. The contributors discuss each of the commonly used research methods for studying translation; theorize about the nature of the cognitive and language representations and cognitive/linguistic transformation mechanisms involved in translation during writing; and make the case that translation is a higher-order executive function that is fundamental to the writing process. The book also reviews the application of research to practice -- that is, the translation of the research findings in education and the work-world for individuals who interact with others using written language to communicate ideas. This volume provides a rich resource for student, theorists, and empirical researchers in cognitive psychology, linguistics, and education; and teachers and clinicians who can use the research in their work.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.” —Booklist (starred review) “The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.” —Library Journal (starred review) “I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.” —Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.” —Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together Math Trailblazers 2E G2 Teacher Implementation Guide SAGE

The third edition of With Literacy and Justice for All: Rethinking the Social in Language and Education continues to document Carole Edelsky's long involvement with socially critical, holistic approaches to the everyday problems and possibilities facing teachers of language and literacy. This book helps education professionals understand the educational/societal situations they are dealing with, and literacy instruction and second language learning in particular contexts. Edelsky does not offer simplistic pedagogical formulas, but rather, progressively works through differences and tensions in the discourses and practices of sociolinguistics, bilingual education, whole language, and critical pedagogy--fields whose practitioners and advocates too often work in isolation from each other and, at times, at cross purposes. In this edition, what Edelsky means by rethinking is improving and

extending her own views, while at the same time demonstrating that such rethinking always occurs in the light of history. The volume includes a completely new Introduction and two entirely new chapters: one on reconceptualizing literacy learning as second language learning, and another on taking a historical view of responses to standardized testing. Throughout, in updating the volume, Edelsky uses a variety of structural styles to note contrasts in her views across time and to make the distinction clear between the original material and the current additions. This edition is a rare example of a scholar owning-up to changes in thinking, and a much needed demonstration of the historically grounded nature of knowledge. As a whole, the third edition emphasizes recursiveness and questioning within a deliberately political framework.
