100 Questions & Answers for Women Living with Cancer Springer Science & Business Media

These stories of cancer survivors talking about their experiences with cancer. It hopes to inspire and empower people affected by cancer.

Livestrong Jones & Bartlett Learning

This multidisciplinary reference explores the concepts and realities of quality of life among cancer survivors in its physical, psychological, cognitive, social, and familial dimensions. Informed by a broad range of fields including genetics, psychiatry, nursing, dentistry, rehabilitation, and ethics, it addresses daily challenges of living for this population, from self-care to cultural concerns and from social interactions to experiences with providers. Family issues of pediatric, young adult, and elder survivors, caregiving parents, and siblings are a major area of concern. And contributors describe interventions for survivors as individuals, in family content, and as part of integrated care across primary and specialty settings. Included among the topics: Play, leisure activities, and cognitive health among older cancer survivors. Genetic mutations in cancer susceptibility genes: a family history of cancer. Cancer patients in a pediatric intensive care unit: a single center experience. The impact of childhood cancer on the quality of life among healthy siblings. When cancer returns: family caregivers and the hospice team. Experiencing cancer services: a story of survival and dissatisfaction. A significant addition to the cancer survivorship literature, *Quality of Life Among Cancer Survivors* is a practice-building resource for oncology and allied health professionals, health psychologists, and social workers, as well as researchers in these fields.

The Role of Integrative Oncology in Cancer Survivorship Springer Science & Business Media

Synopsis Are you or is someone you love facing a cancer diagnosis in the prime of life? You're not alone. The likelihood of developing cancer in one's lifetime is 1 in 2 for males and 1 in 3 for females, and the numbers are rising. A cancer diagnosis at any age is traumatic, but young to middle-aged adults who are often raising or planning for children, establishing careers, and getting on their financial feet face unique challenges. When cancer strikes, this group can become overwhelmed by navigating treatment options, mounting debt from medical bills, threats to fertility, and the necessity of facing one's mortality. It can become a mental battle ground. In *Not Now, Cancer, I'm Busy*, Melissa Trevathan-Minnis and Deanne Meeks Brown offer research, resources, and support to help you overcome the psychological trauma of cancer. Sharing their own personal stories, along with insights from other young cancer survivors, these two mental health professionals guide you through the rollercoaster of emotions from diagnosis and treatment to transitioning back to life post-treatment. While the challenges of cancer survivorship are many, so are the coping strategies available to help promote recovery and well-being. *Not Now, Cancer, I'm Busy*, addresses cancer through the lens of mental health and offers strategies to not only cope with the challenges of cancer, but to build a life full of meaning and intention despite them. From developing a fighting spirit and learning how to slow down, to breaking down barriers to mental health and spiritual growth, this book will help you tap into your personal strengths and resilience. Although a cancer diagnosis in early and midlife can be earth-shattering, the trauma of cancer can actually leave you stronger and better equipped-if you let it. WORDS OF PRAISE OMG! This is a fabulous book--the one everyone dealing with cancer has been waiting for! While the book is specifically addressed to YMA's (Young and Middle Adults) it is an exhaustive compendium of experience, issues, and directions for all those touched in any way by cancer--victims, survivors, family, friends and the rest of us who care in one way or another. From diagnosis to survivorship or to disability and death Melissa and Deanne offer amazingly comprehensive research, suggestions, and enlightenment at every step of the journey they take us on. Most interesting to me as a psychologist-psychoanalyst and survivor of cancer at age 21 are the sections on post-traumatic growth, developing a personal narrative, and the progression from surviving to thriving. *Not Now, Cancer* is an absolute triumph by two people who artfully weave their personal thriving experiences of themselves and of their families and friends with a wealth of incredible details of their cancer experiences that are equally well applicable to people of all ages who are faced with life-threatening diagnoses or circumstances. Congratulations Melissa and Deanne and thanks. --Lawrence Hedges, PhD, PsyD, ABPP, Director, the Listening Perspectives Study Center

Cancer Care for the Whole Patient Jones & Bartlett Learning

A self-management program for cancer survivors offers counsel on how to take charge of one's physical, mental, and emotional challenges, in a step-by-step reference that makes recommendations for navigating the health-care system, obtaining affordable medication, and managing stress. Original.

Addressing Cancer Survivorship Through Public Health Research, Surveillance, and Programs Springer Science & Business Media

Cancer is something that has touched almost everyone in one way or another. At 29 years old, Emily Yatsko Sandusky is a four time cancer survivor. From the time Emily can remember battling cancer has been part of her story. When Emily and her family found out that she had Leukemia when she was only 5 years old they had no idea what lied ahead. They had no idea that this was just the beginning a truly a lifelong journey. For Emily and her family it was never a question of survival. In this compilation of experiences, reflections and journal entries Emily shares her 24 years of cancer survivorship through her point of view as she went through cancer treatment and also as she tries to make sense of it all when looking back on her life. *Hope Triumphs ALL: A True, inspirational life story about a young 4-time cancer survivor is an inspiring story of courage, strength and hope. Starting from the time she was a young girl Emily had the choice to give up as the challenges continued to present themselves, but that was never even a thought that crossed her mind. Emily takes you through her memories and thoughts during and after each of the four times that she had Leukemia, in hopes that cancer survivors and co-survivors can connect to her story as they experience there own journey and see that there is life during and after cancer. "Hope Triumphs ALL" is an honest, funny and a truly unbelievable story of how pure will power and attitude can take you where most people never thought possible. The book title "Hope Triumphs ALL" has a dual meaning - ALL also stands for Acute Lymphocytic Leukemia.*

Long-Term Survivorship Care After Cancer Treatment John Wiley & Sons

Cancer survivors are returning to the workplace in higher numbers than ever before. This is a positive outcome of the "war on cancer", however, many of these cancer survivors face the possibility of illness- or treatment-related complications; employer discrimination or harassment; and other serious concerns. *Cancer Survivorship and Work* reviews many of the issues relevant to cancer survivors in the workplace from the survivors', employers', and global perspectives. This interdisciplinary and international volume brings together experts in fields as varied as epidemiology, economics, rehabilitation, psychology, human factors and ergonomics; law, and public policy to create a unique, up-to-date reference of what is currently known and what needs to be considered in the future. With this knowledge, challenges faced by this growing population can be better addressed by health care providers, employers, survivors and their families.

A Nurse's Guide to Caring for Cancer Survivors Jones & Bartlett Learning

Hearing the words "You have cancer" can be devastating--some cancer patients even say that the emotional pain and loss of certainty from hearing this are worse than the pains from the cancer, surgeries, radiation, chemotherapy, and other treatments. This is the intimate journey of a melanoma and breast cancer survivor who honestly, and sometimes even humorously, shares her own story and offers supportive emotional tools to help people diagnosed with cancer, and their loved ones and caregivers, work through the emotional pain and upheaval of a cancer diagnosis. You will be supported in knowing what it feels like to hear you have cancer and be given a variety of helpful ideas to start feeling better whether you are newly diagnosed, in treatment, or months or years after treatment. If you are a caregiver, friend, or family member who wants to help, you will get a better understanding of the cancer experience as well as tools to help the person you care about.

Cancer Survivorship Springer

With today's increasing number of cancer survivors, more clinical nurses are helping their patients through the survivorship process. *A Nurse's Guide to Caring for Cancer Survivors: Breast Cancer* is an essential reference for clinical nurses to help identify key components of survivorship care. This diagnosis specific guide provides nurses with information to improve the quality of their patient's life. Key Topics Include: Overview of the cancer diagnosis. Survivorship Handbook of Cancer Survivorship

Principles of Tumors: A Translational Approach to Foundations, Second Edition, provides a concise summary of translational/interdisciplinary topics on the various aspects of tumors, especially abnormalities in their cells, their causes and effects on patients. Topics discussed include how genomic abnormalities in tumors may result from the actions of carcinogens and how genomic changes determine the cell biological/morphological abnormalities in tumor cell populations. In addition, the relationships between tumor cell genomics and therapeutic outcomes are described. There are also supporting appendices on general bioscience, including the principles of histology (the cells and tissues of the body), genetics, pathology, radiology and pharmacology. This book gives a thorough, detailed, yet concise account of the main bioscience, clinical and therapeutic aspects of tumors. It emphasizes the translational aspects of research into tumors with extensive discussions of interdisciplinary issues. The content in this book will be invaluable for researchers and clinicians involved in collaborative projects where it is necessary to understand fundamental issues in other branches of biomedicine. Presents content that has been totally updated with the most recent developments of the field, including new chapters on tumor imaging exams, new surgical techniques, immunotherapy, gene therapy, and several novel therapies using natural and synthetic compounds Presents translational approaches for every topic to improve conceptual insights for new research projects Covers a broad range of subjects, making it easier for the reader to understand related fields Includes diagrams for complex topics to aid in understanding for non-specialists

Quality of Life Among Cancer Survivors BoD -- Books on Demand

Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer--including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life--cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. *Cancer Care for the Whole Patient* recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.

Women's Cancers Jones & Bartlett Learning

With the risk of more than one in three getting cancer during a lifetime, each of us is likely to experience cancer, or know someone who has survived cancer. Although some cancer survivors recover with a renewed sense of life and purpose, what has often been ignored is the toll taken by cancer and its treatment â €œon health, functioning, sense of security, and well-being. Long lasting effects of treatment may be apparent shortly after its completion or arise years later. The transition from active treatment to post-treatment care is critical to long-term health. From Cancer Patient to Cancer Survivor focuses on survivors of adult cancer during the phase of care that follows primary treatment. The book raises awareness of the medical, functional, and psychosocial consequences of cancer and its treatment. It defines quality health care for cancer survivors and identifies strategies to achieve it. The book also recommends improvements in the quality of life of cancer survivors through policies that ensure their access to psychosocial services, fair employment practices, and health insurance. This book will be of particular interest to cancer patients and their advocates, health care providers and their leadership, health insurers, employers, research sponsors, and the public and their elected representatives.

Survivorship: A Sociology of Cancer in Everyday Life Lippincott Williams & Wilkins

This book provides a contemporary and comprehensive examination of cancer in everyday life, drawing on qualitative research with people living with cancer, their family members and health professionals. It explores the evolving and enduring affects of cancer for individuals, families and communities, with attention to the changing dynamics of survivorship, including social relations around waiting, uncertainty, hope, wilfulness, obligation, responsibility and healing. Challenging simplistic deployments of survivorship and drawing on contemporary and classical social theory, it critically examines survivorship through innovative qualitative methodologies including interviews, focus groups, participant produced photos and solicited diaries. In assembling this panoramic view of cancer in the twenty-first century, it also enlivens core debates in sociology, including questions around individual agency, subjectivity, temporality, normativity, resistance, affect and embodiment. A thoughtful account of cancer embedded in the undulations of the everyday, narrated by its subjects and those who informally and formally care for them, Survivorship: A Sociology of Cancer in Everyday Life outlines new ways of thinking about survivorship for sociologists, health and medical researchers and those working in cancer care settings.

From Cancer Patient to Cancer Survivor Jones & Bartlett Publishers

A practical and evidence-based guide for student, pre-registration and qualified pharmacists Symptoms in the Pharmacy is an indispensable guide to the management of common symptoms seen in the pharmacy. With advice from an author team that includes both pharmacists and GPs, the book covers ailments which will be encountered in the pharmacy on a daily basis. Now in its sixth edition Symptoms in the Pharmacy has been fully revised to reflect the latest evidence and availability of new medicines. There are new sections and case studies for 'POM' to 'P' switches including chloramphenicol, sumatriptan, diclofenac, naproxen and amorolfine. This edition features colour photographs of skin conditions for the first time enabling the differentiation and diagnosis of common complaints. The public health and illness prevention content have been expanded to support this increasingly important aspect of the pharmacist ' s work. The book is designed for quick and easy reference with separate chapters for each ailment. Each chapter incorporates a decision making framework in which the information necessary for treatment and suggestions on ‘ when to refer ’ is distilled into helpful summary boxes. At the end of each chapter there are example case studies providing the view of pharmacists, doctors and patients for most conditions covered. These easy-to-follow- chapters can be read cover to cover or turned to for quick reference. This useful guide should be kept close at hand for frequent consultation.

A Nurse ' s Guide to Caring for Cancer Survivors CreateSpace

Cancer survivorship has become an increasingly important issue in the world of oncology care, as more people are living longer after a diagnosis than ever before. The American Cancer Society estimates that the number of cancer survivors in the United States will increase by more than four million by 2030. As higher numbers of survivors live past the five-year mark into extended survival, the oncology care community has become more aware of the pervasive long-term and late effects of cancer and its treatment. Survivors can experience a host of issues, such as cognitive dysfunction, reproductive and sexual problems, and cardiac disease, depending on the type of cancer and treatment modality. Unfortunately, gaps in survivorship care are common. Cancer Survivorship: Interprofessional, Patient-Centered Approaches to the Seasons of Survival addresses many issues survivors may face at diagnosis, during treatment and recovery, throughout long-term survivorship, and at the end of life. This book provides information as it relates to these distinct phases of survival" €œfirst described by Dr. Fitzhugh Mullan, a cancer survivor and early survivorship advocate, in his seminal "Seasons of Survival" editorial. Most importantly, this book offers education to healthcare professionals so that they may help cancer survivors and their families achieve better quality of life.

Not Now, Cancer, I'm Busy National Academies Press

Patients with breast and gynaecological cancers have to contend with a large number of difficult and challenging issues. To help them to do this it is vital that their health carers are fully informed in all aspects of women's cancers. This book provides a comprehensive and meaningful picture of this oncological area, including epidemiology, histopathology, staging, genetic predisposition, sexual function, fertility, treatment and management, survivorship, and palliative care. To give this book added credibility and holistic application, contributions of women with cancer have been included, and the text is interspersed with patient accounts and experiences. Women's Cancers is essential reading for all nurses and

health care professionals working in cancer care settings, as well as patients and families.

A Guide to Survivorship for Women with Ovarian Cancer National Academies Press

This authoritative reference examines in depth the myriad challenges facing pediatric cancer survivors and proposes a robust framework for structured follow-up of these patients through adulthood. Approaches to long-term follow-up include both established models of care and targeted models of lifelong surveillance of late effects by bodily systems and neurological outcomes. Sections devoted to quality of life and re-entry after treatment focus on key concerns such as health risk behaviors, school and career issues, psychological challenges, and care disparities. And a robust resources section adds extra usefulness to the expert coverage. Among the Handbook's topics: • Developmental considerations in the transition from child and adolescent to adult survivorship. • Long-term follow-up roadmaps by disease and treatment. • Neuropsychological effects of pediatric brain tumors and associated treatment. • Building resiliency in childhood cancer survivors: a clinician ' s perspective. • School issues and educational strategies for survivors of childhood cancer. • Educating and preparing the childhood cancer survivor for long-term care: a curriculum model for cancer centers. A work of rare scope, scholarship, and clinical acumen, the Handbook of Long-Term Care of the Childhood Cancer Survivor is a rewarding, practice-building resource essential to a wide range of healing professionals, including primary care physicians, pediatricians, oncologists, nurses, psychologists, neuropsychologists, child psychologists, and licensed therapists.
