Recognizing the showing off ways to get this book **Journal Of History Ebooks** is additionally useful. You have remained in right site to begin getting this info. get the Journal Of History Ebooks join that we offer here and check out the link.

You could buy guide Journal Of History Ebooks or acquire it as soon as feasible. You could quickly download this Journal Of History Ebooks after getting deal. So, in imitation of you require the book swiftly, you can straight acquire it. Its fittingly no question easy and for that reason fats, isnt it? You have to favor to in this melody

Panepiphanal World McGraw-Hill Education (UK)
E-Books in Academic Libraries: Stepping Up to the Challenge provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an

association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Panepiphanal World is the first in-depth study of the

forty short texts James Joyce called "epiphanies." Composed between 1901 and 1904, at the beginning of Joyce's writing career, these texts are often dismissed as juvenilia. Sangam MacDuff argues that the epiphanies are an important point of origin for Joyce's entire body of work, showing how they shaped the structure, style, and language of his later writings. Tracing the ways Joyce incorporates the epiphanies into *Dubliners*, *A Portrait of the Artist as a Young Man*, *Ulysses*, and *Finnegans Wake*, MacDuff describes the defining characteristics of the epiphanies--silence and repetition, materiality and reflexivity--as a set of recurrent and inter-related tensions in the development of Joyce's oeuvre. MacDuff uses fresh archival evidence, including a new typescript of the epiphanies that he discovered, to show the importance of the epiphanies throughout Joyce's career. MacDuff compares Joyce's concept of epiphany to classical, biblical, and Romantic revelations, showing that instead of pointing to divine transcendence or the awakening of the sublime, Joyce's epiphanies are rooted in and focused on language. MacDuff argues that the Joycean epiphany is an apt characterization of modernist literature and that the linguistic forces at play in these early texts are also central to the work of Joyce's contemporaries including Woolf, Beckett, and Eliot. A volume in the Florida James Joyce Series, edited by Sebastian D. G. Knowles. An Open Access edition of this book was published with the support of the Swiss National Science Foundation.

"The authors are familiar with the emerging jargon of media convergence and they define large parts of it well. They have also laboured impressively to gather and define useful examples of journalese ... This book is a labour of love that reflects immense care and learning. It makes a helpful contribution to a fledgling field of academia and to uniting the cultures of news and journalism studies." Tim Luckhurst, University of Kent, UK

This comprehensive glossary offers clear and insightful definitions of the most significant keywords in news and journalism studies. Ranging from 'above the fold' to 'zinger', and with over 400 terms in between, it covers words associated with newspapers, radio and television news, magazines, photojournalism and internet reporting. Other examples include 'agenda setting', 'libel', 'news values', 'objectivity', 'scoop' and 'tabloidization'. Written by two of the field's leading scholars, it offers an informed perspective on the key terms. It considers a range of genres, including business, crime, environmental, fashion, lifestyle, investigative, science, sports and war journalism as well as looking at new alternatives such as 'Wikinews' and 'Twitter'. This lively and engaging treatment will provide students, researchers and journalists

with a solid grounding in the fast-moving vocabulary of news and journalism studies. [Journal of Researches](#) The Journal of Negro History, Volume 1, January

The 2017 Family History Journal is a great way to jot down your research goals, keep track of your current Genealogy research, chronicle your family history by month, or use it any way you want! This handy journal is divided by month so you can easily view your monthly entries. The 2017 Family History Journal by Genealogy Girl Talks is a great gift idea for the Family Historian in your life, too!

A harrowing chronicle by two leading historians, capturing in real time the events of a year marked by multiple devastations. When we look back at the year 2020, how can we describe what really happened? In *A Deeper Sickness*, award-winning historians Margaret Peacock and Erik Peterson set out to preserve what they call the “ focused confusion, ” and to probe deeper into what they consider the Four Pandemics that converged around the 12 astonishing months of 2020: • Disease • Disinformation • Poverty • Violence Drs. Peacock and Peterson use their interdisciplinary expertise to extend their analysis beyond the viral science, and instead into the social, political, and historical dimensions of this crisis. They consulted with dozens of experts and witnesses from a wide range of fields—from leading epidemiologists and health care workers to leaders of the Black Lives Matter movement, district attorneys, political scientists, philosophers, and more. Their journey revealed a sick country that believed it was well, a violent nation that believed it was peaceful; one that mistook poverty for prosperity and accountability for rebellion. Organized into the journal-entries along with dozens of archival images, *A Deeper Sickness* will help readers sift through the chaos and misinformation that characterized those frantic days. It is both an unflinching indictment of a nation that is still reeling and a testament to the power of human resilience and collective memory. Readers can share their story and become a contributing author by visiting an interactive digital museum, where the authors have preserved dozens of more stories and interviews. Visit Margaret Peacock and Erik L. Peterson ’ s digital museum at adhc.lib.ua.edu/pandemicbook/.

[Europe, 1815-1914](#) McGraw Hill

"With the compelling evidence that more redistributive universal welfare benefits and education provide the main escalator to reducing inequalities, this is a timely and thought-provoking book for all those concerned to reduce our societies ’ embedded structural inequalities, cumulative disadvantages and health inequalities." Australian and New Zealand Journal of Public Health "Unequal Lives is the book that we have all been waiting for. In this skilfully crafted volume, Hilary Graham makes the vital connection between health inequalities and social inequalities in a way that opens up new understandings of both concepts and consequences for policy. Scholarly yet accessible, this is a 'must read' book for researchers, policymakers and practitioners alike." Margaret Whitehead, WH Duncan Professor of Public Health, University of Liverpool, UK What is meant by health inequalities and socioeconomic inequalities? What evidence is there to support the link between socioeconomic status and health? Why do these links persist over time, between and within societies, and across people ’ s lives? What part do policies play in the persistence of social and health inequalities? *Unequal Lives* provides an evidence-based introduction to social and health inequalities. It brings together research from social epidemiology, sociology and social policy to guide the reader to an understanding of why people ’ s lives and people ’ s health remain so unequal, even in rich societies where there is more than enough for all. The book introduces the non-specialist to key concepts like health inequalities and health inequities, social class and socioeconomic position, social determinants and life course, as well as to the key indicators of health and socioeconomic position. It provides a wealth of evidence on socioeconomic inequalities in health at both national and global level, and explores how these inequalities persist as countries industrialise, patterns of employment and family life change, and chronic diseases emerge as the big killers. Consideration is given to policy and its impact on inequalities within the UK, Europe and

beyond and an assessment made of health inequalities throughout the life. This new book from best selling author Hilary Graham is of particular interest to students in sociology, social policy, health studies, health promotion and public health as well as to social work and community nursing students and those working in the health and welfare fields.

EBOOK: Evidence-Based Research Princeton University Press

This book examines the role of war in shaping the African state, society, and economy by tracing shifts in the culture and practice of war.

Ebook: The Science of Psychology: An Appreciative View McGraw-Hill Education (UK)

“ Erudite and wide-ranging, perceptive and provocative, lively and up-to-date – Shane Blackman has produced a book with something to offer to just about anyone interested in drugs in contemporary society. Blackman uncovers hidden histories, points out the contradictions running through media, popular culture and official policy and highlights the challenges facing us. Chilling Out is a book that will be a boon to students and a valuable resource for both teachers and researchers. ” Nigel South, Professor, Department of Sociology and Research Professor, Department of Health and Human Sciences, University of Essex. How are drug war politics, drug prevention, popular culture and drug consumption interconnected? What are the major contradictions, assumptions and silences within the moral arguments of drug policy makers? What are the implications for the viability of drugs policy? This book critically examines the assumptions underlying drug prohibition and explores the contradictions of drug prevention policies. For the first time in this field, it combines a wide-ranging exploration of the global political and historical context with a detailed focus on youth culture, on the basis that young people are the primary target of drug prevention policies. Chilling Out provides a critical map of drugs, bringing together work on drugs as a source of political state repression and regulation of morality through medical discourse, work on drugs as cultural commodities in film, popular music, advertising and tourism, work on ‘ drug normalisation ’, subcultural deviance and the politics of drug education. This clear and enlightening

text for sociology, health and media and cultural studies courses argues for an holistic and a critical understanding of drugs in society, which can be the basis for a more coherent approach to drug control. Practitioners and policy makers will find it a thought-provoking and informative source.

Introduction to Public Health Elsevier

Ten years ago, most scholars and students relied on bulky card catalogs, printed bibliographic indices, and hardcopy books and journals. Today, much content is available electronically or online. This book examines the history of one of the first, and most successful, digital resources for scholarly communication, JSTOR. Beginning as a grant-funded project of the Andrew W. Mellon Foundation at the University of Michigan, JSTOR has grown to become a major archive of the backfiles of academic journals, and its own nonprofit organization. Roger Schonfeld begins this history by looking at JSTOR's original mission of saving storage space and thereby storage costs, a mission that expanded immediately to improving access to the literature. What role did the University play? Could JSTOR have been built without the active involvement of a foundation? Why was it seen as necessary to "spin off" the project? This case study proceeds as an organizational history of the birth and maturation of this nonprofit, which had to emerge from the original university partnership to carve its own identity. How did the grant project evolve into a successful marketplace enterprise? How was JSTOR able to serve its twofold mission of archiving its journals while also providing access to them? What has accounted for its growth? Finally, Schonfeld considers implications of the economic and organizational aspects of archiving as well as the system-wide savings that JSTOR ensures by broadly distributing costs.

Warfare in African History McGraw-Hill Education (UK)

Using a topics-based approach organized around provocative questions about the interaction of sports, culture and society, Sports in Society presents an accessible introduction to research and theory in the sociology of sport. This new edition continues the legacy of the previous editions while introducing new material and examples that bring theory to life. Current debates in sports, such as how youth participation can be increased or sport funding allocated, have been integrated throughout the text to

provide a holistic view of society. An Online Learning Centre accompanies this book offering a range of lecturer support materials as well as resources and tests for students.

Process Technology provides a general overview about chemical and biochemical process technology. It focuses on the structure and development of production processes, main technological operations and the important aspects of process economics. The theoretical foundations in each chapter are supplemented by case studies and examples in a clear and instructive manner to illustrate the practical aspects. The author highlights operating principles, reasons for application and available industrial equipment of technological operations. Aim is to facilitate those without a process technology background in multi-disciplinary cooperation with (bio-) chemical engineers by providing an overview of this exciting field. The textbook is organized into seven distinct parts: Structure of the chemical industry and (bio-) chemical processes (Bio-) Chemical reaction engineering Molecular separations (distillation, extraction, absorption, adsorption) Mechanical separations (filtration, sedimentation, membranes) Particle and final product manufacturing Development, scale-up, design and safety of processes Major industrial process descriptions

Alan Turing: His Work and Impact UNC Press Books

As African American women left the plantation economy behind, many entered domestic service in southern cities and towns. Cooking was one of the primary jobs they performed, feeding generations of white families and, in the process, profoundly shaping southern foodways and culture. In *Cooking in Other Women's Kitchens: Domestic Workers in the South, 1865-1960*, Rebecca Sharpless argues that, in the face of discrimination, long workdays, and low wages, African American cooks worked to assert measures of control over their own lives. As employment opportunities expanded in the twentieth century, most African

American women chose to leave cooking for more lucrative and less oppressive manufacturing, clerical, or professional positions. Through letters, autobiography, and oral history, Sharpless evokes African American women's voices from slavery to the open economy, examining their lives at work and at home. The enhanced electronic version of the book includes twenty letters, photographs, first-person narratives, and other documents, each embedded in the text where it will be most meaningful. Featuring nearly 100 pages of new material, the enhanced e-book offers readers an intimate view into the lives of domestic workers, while also illuminating the journey a historian takes in uncovering these stories.

Process Technology Purdue University Press
Community work is a unique and important activity that has the potential to help individuals, groups and communities achieve change. This brand new update of an established and acclaimed text explores and analyses different theoretical approaches to community work. Written in a highly accessible style, this book is grounded in practice issues and tackles political and theoretical issues head-on. New to the second edition: Analysis of the work of New Labour Consideration of Coalition government policies, for example, the 'Big Society' project and the impact of budget cuts A new international dimension throughout the text, and an important new chapter on international community work New definitions of 'community' explored to take into account a diverse population Increased emphasis on community work values, skills and challenges Updated pedagogy, including end of chapter summaries and reflective questions References the latest writings in the field Written by an established international expert, this book will be valuable for students on qualifying programmes, practitioners, policy makers and commentators, and those engaged in community work in all capacities. "Analysing Community

Work' provided a key text, tackling issues of theory and practice in accessible ways for some two decades. This second edition builds upon the strengths of the first, updating the book to take account of the major changes that have been taking place since then, both in Britain and internationally. Popple 's critical consideration of the impacts of globalization, neo-liberalism, changing technologies, increasing inequalities and increasing concerns with environmental issues will be particularly welcomed. This edition will be essential reading for those who read and appreciated the first as well as for a new generation of readers." Marjorie Mayo, Emeritus Professor of community development, Goldsmiths, University of London, UK "Popple's book was one of the key overviews of British community work when it first appeared in 1995. In the last few years, the need for a revised and updated version has been increasingly obvious and Popple has now obliged. The last twenty years have seen substantial changes in the political, economic and organisational context within which community work operates and Popple has fully reflected this whilst remaining clear about its basic tenets and goals. This is a highly welcome addition to contemporary community work literature." Gary Craig, Professor of Community Development and Social Justice, Durham University, UK
EBOOK: ECONOMETRICS WITH OLC
McGraw-Hill Education (UK)

"The editors have brought together a range of eminent contributors who present a range of issues throughout the life cycle. The book asserts that it hopes to 'assist readers to anticipate change and discontinuity in people's lives and think about strategies to support them' through the many challenges that they may face in their lives. In my view this book certainly does that and the editors and contributors are to be congratulated on the production of a relevant and contemporary text that I have no hesitation in both endorsing and recommending to all

involved in supporting and or caring for people with learning disabilities." Professor Bob Gates, Project Leader - Learning Disabilities Workforce Development, NHS Education South Central, UK "The editors have gathered an authoritative faculty to present and discuss a range of contemporary issues; both practical and ethical. The text is well grounded in the lived experience of people with disability and draws on the evidence-base of contemporary science. Each chapter includes thought provoking exercises. This is a seminal text for students and practitioners, researchers and policy makers." Associate Professor Keith R. McVilly, Deakin University, Australia "I currently own a copy of the first edition and it has proved an invaluable resource time and time again. There is not an essay I complete that does not make reference to the book and I can consistently use it to reflect back on my practice as a student nurse and social worker. Having read several extracts from the new edition it does appear to include very high quality content covering learning disabilities over the lifespan ... if I were to personally recommend any book for budding or current learning disability professionals then this would be it." James Grainger, Student Nurse/Social Worker, Sheffield Hallam University, UK "I like the way it has primary and secondary information from a range of sources. The exercises in the book also get you to think about the situation in question which helps us think about our values and anti-oppressive practice ... This book really does start with the basics and having a learning disability from birth and the effects, to in depth knowledge and literature ... This book would be very helpful to me as it brings in literature policies and models from both a health and social side, which is important for my course and collaborative working." Laura Jean Lowe, Student Nurse, Sheffield Hallam University, UK "It is written with a clearly conveyed in-depth knowledge and in a way that has professional lived experience within the context of the work. The authors have taken into account the emotional, client-centred approach to the modern practitioner's practice ... The book gives a true wealth of good practice scenarios that can only help practitioners be good at what they do and aspire to be." Lee Marshall, Student Nurse, Sheffield Hallam University, UK With its spread of chapters covering key issues across the life cycle this text has established itself as the foundational primer for those studying the lived experiences of people with learning disabilities and their families, and outcomes achieved through services and support systems. Recognising learning disability as a lifelong disability, this accessible book is structured around the life cycle. The second edition is refreshed and expanded to include seven new chapters, covering: Aetiology Breaking news (about disability) and early intervention Transition to adulthood The sexual lives of women Employment Personalisation People with hidden identities With contributions from respected figures from a range of disciplines, the book draws heavily upon multidisciplinary perspectives and is based on the latest research and evidence for practice. The text is informed by medical, social and legal models of learning disability, exploring how "learning disability" is produced, reproduced and understood. Extensive use is made of real-life case studies, designed to bring theory, values, policy and practice to life. Narrative chapters describe, in the words of people with learning disabilities themselves, their lives and aspirations. They helpfully show readers the kinds of roles played by families, advocates and services in

supporting people with learning disabilities. New exercises and questions have been added to encourage discussion and reflection on practice. Learning Disability is core reading for students entering health and social care professions to work with people with learning disabilities. It is a compelling reference text for practitioners as it squarely addresses the challenges facing people with learning disability, their loved ones and the people supporting them. Contributors Dawn Adams, Kathryn Almack, Dorothy Atkinson, Nigel Beail, Christine Bigby, Alison Brammer, Jacqui Brewster, Hilary Brown, Jennifer Clegg, Lesley Cogher, Helen Combes, Clare Connors, Bronach Crawley, Eric Emerson, Margaret Flynn, Linda Gething, Dan Goodley, Peter Goward, Gordon Grant, Chris Hatton, Sheila Hollins, Jane Hubert, Kelley Johnson, Gwynnyth Llewellyn, Heather McAlister, Michelle McCarthy, Alex McClimens, Roy McConkey, David McConnell, Keith McKinstrie, Fiona Mackenzie, Ghazala Mir, Ada Montgomery, Lesley Montisci, Elizabeth Murphy, Chris Oliver, Richard Parrott, Paul Ramcharan, Malcolm Richardson, Bronwyn Roberts, Philippa Russell, Kirsten Stalker, Martin Stevens, John Taylor, Irene Tuffrey-Wijne, Sally Twist, Jan Walmsley, Kate Woodcock

Over 5,000 high-school students of different social, religious, and national backgrounds were studied to show the effects of family experience, neighborhoods, minority groups, etc. on their self-image and response to society. Originally published in 1965. The

Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Journal of America in the Pandemic Year Simon and Schuster

ECONOMIST BOOKS OF THE YEAR 2016 'A scintillating, encyclopaedic history, rich in detail from the arcane to the familiar... a veritable tour de force' Richard Overy, New Statesman 'Transnational history at its finest ... social, political and cultural themes swirl together in one great canvas of immense detail and beauty'

Gerard DeGroot, The Times 'Dazzlingly erudite and entertaining' Dominic Sandbrook, The Sunday Times A masterpiece which brings to life an extraordinarily turbulent and dramatic era of revolutionary change. The Pursuit of Power draws on a lifetime of thinking about nineteenth-century Europe to create an extraordinarily rich, surprising and entertaining panorama of a continent undergoing drastic transformation.

The book aims to reignite the sense of wonder that permeated this remarkable era, as rulers and ruled navigated overwhelming cultural, political and technological changes. It was a time where what was seen as modern with amazing speed appeared old-fashioned, where huge cities sprang up in a generation, new European countries were created and where, for the first time, humans could communicate almost instantly over thousands of miles. In the period bounded by the Battle of Waterloo and the outbreak of World War I, Europe dominated the rest of the world as never before or since: this book breaks new ground by showing how the continent shaped,

and was shaped by, its interactions with other parts of the globe. Richard Evans explores fully the revolutions, empire-building and wars that marked the nineteenth century, but the book is about so much more, whether it is illness, serfdom, religion or philosophy. *The Pursuit of Power* is a work by a historian at the height of his powers: essential for anyone trying to understand Europe, then or now.
