Malaria Spotlight - Emerging Infectious Diseases journal - CDC

Malaria is a disease of tropical and subtropical regions, having been eradicated from temperate countries steadily over the last 100 years. It is transmitted by the bite of the female Anopheles mosquito. Disease incidence depends on environmental suitability for local vectors in terms of altitude, climate, vegetation, and implementation of control measures, and hence is inextricably

Malaria Journal is aimed at the scientific community interested in malaria in its broadest sense. It is the only journal that publishes exclusively articles on malaria and, as such, it aims to bring together knowledge from the different specialties involved in this very broad discipline, from the bench to the bedside and to the field.

CDC - Malaria - About Malaria - Biology

Introduction. Human malaria is an ongoing public health crisis affecting multiple continents, with the highest numbers of cases and people at risk occurring in sub-Saharan Africa [1, 2]. There, the principal vectors of *Plasmodium falciparum* malaria are members of a species complex called *An.gambiae sensu lato* [3, 4]. These sibling species are nearly indistinguishable morphologically, though ...

CDC - Parasites - Malaria

The malaria parasite life cycle involves two hosts. During a blood meal, a malaria-infected female Anopheles mosquito inoculates sporozoites into the human host. Sporozoites infect liver cells and mature into schizonts, which rupture and release merozoites. (Of note, in *P. vivax* and *P. ovale* a dormant stage [hypnozoites] can persist in the liver (if untreated) and cause relapses by invading ...

Malaria Chemoprevention in the Postdischarge Management of ...

Malaria disease can be categorized as uncomplicated or severe (complicated). In general, malaria is a curable disease if diagnosed and treated promptly and correctly. All the clinical symptoms associated with malaria are caused by the asexual erythrocytic or blood stage parasites.

International Journal of Malaria and Tropical Diseases (IJMTD)

The International Journal of Malaria and Tropical Diseases (IJMTD) (formally known as the Journal of Malaria in Africa and the Tropics (JMAT)) is a publication of the malariologists and researchers in tropical diseases. Its aim is to educate, improve the practice of malaria treatment, stimulate research, encourage academic tropical medicine and enhance patient care.

Archive of "Malaria Journal".

Malaria is a life-threatening disease caused by parasites that are transmitted to people through the bites of infected female Anopheles mosquitoes. It is preventable and curable. In 2019, there were an estimated 229 million cases of malaria worldwide. The estimated number of malaria deaths stood at 409 000 in 2019.

Malaria - WHO

Malaria is a mosquito-borne disease caused by a parasite. People with malaria often experience fever, chills, and flu-like illness. Left untreated, they may develop severe complications and die. A parasite is an organism that lives on or in a host and gets its food from or at the expense of its host. Parasites can cause disease in humans.

Malaria Journal is an Open Access, peer-reviewed, online journal monitored by ISI, Medline and PubMed. All articles are published without barriers to access, immediately upon acceptance. Malaria...
