How to Create and Use Rubrics for Formative Assessment and Grading Corwin Press

School success in the 21st century requires proficiency with expository discourse -- the use and understanding of informative language in spoken and written modalities. This occurs, for example, when high school students read their textbooks and listen to their teachers' lectures, and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations. Although many students are proficient with the expository genre,

others struggle to meet these expectations. This book is designed to provide information on the use and understanding of expository discourse in school-age children, adolescents, and young adults. Recently, researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders. Although many books have addressed the development of conversational and narrative discourse, by comparison, books devoted to the topic of expository discourse are sparse. This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders. It will be of interest to a range of professionals, including speech-language pathologists, teachers, linguists, and psychologists who are concerned with language development and disorders.

Learning from Each Other DIANE Publishing

What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In

addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

Over the last decade task-based approaches to language learning and teaching (TBLT) have

become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in

their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.
