What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus

task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

In this timely tale of immigration, two cousins learn the importance of family and friendship. A year of discoveries culminates in a performance full of surprises, as two girls find their own way to belong. Mexico may be her parents' home, but it's certainly not Margie's. She has finally convinced the other kids at school she is one-hundred percent American—just like them. But when her Mexican cousin Lupe visits, the image she's created for herself crumbles. Things aren't easy for Lupe, either. Mexico hadn't felt like home since her father went North to find work. Lupe's hope of seeing him in the United States comforts her some, but learning a new language in a new school is tough. Lupe, as much as Margie, is in need of a

friend. Little by little, the girls' individual steps find the rhythm of one shared dance, and they learn what "home" really means. In the tradition of *My Name is Maria Isabel*—and simultaneously published in English and in Spanish—Alma Flor Ada and her son Gabriel M. Zubizarreta offer an honest story of family, friendship, and the classic immigrant experience: becoming part of something new, while straying true to who you are.

School success in the 21st century requires
proficiency with expository discourse -- the use
and understanding of informative language in
spoken and written modalities. This occurs, for
example, when high school students read their
textbooks and listen to their teachers' lectures,
and later are asked to demonstrate their
knowledge of this complex topic through oral
reports and essay examinations. Although
many students are proficient with the
expository genre, others struggle to meet these
expectations. This book is designed to provide
information on the use and understanding of
expository discourse in school-age children,
adolescents, and young adults. Recently,
researchers from around the world have been
investigating the development of this genre in
typical students and in those with language
disorders. Although many books have
addressed the development of conversational
and narrative discourse, by comparison, books
devoted to the topic of expository discourse are
sparse. This crossdisciplinary volume fills that
gap in the literature and makes a unique
contribution to the study of language
development and disorders. It will be of interest
to a range of professionals, including speech-
language pathologists, teachers, linguists, and
psychologists who are concerned with language
development and disorders.
