Who is the Holy Spirit? The book of Acts has been described as an account of the New Testament Church. But, what if it is primarily a revelation of the person of the Holy Spirit? Delve into this journey of curiosity and exploration of the third person of the Trinity. See if you cannot find something new about the Holy Spirit not only in the Biblical text, but also in your own life. M.R. Hyde invites you to learn about God from the Bible, and in particular, from the book of Acts. This devotional journey, third in The Trinity

series, helps readers move from the Bible as just a history book or biographies of people of faith to the person and character of the God of the universe-both personal and majestic, righteous and merciful, terrifying and wonderful. This book is divided into small sections of Acts designed for personal or small group interaction.

This book, The Book of It, is not the ultimate and single explanation of what its author has uncovered by years of reading, research, and listening to the words and teachings of others. The fact is that the only part of It that can be described by a single strand within The Book of It explains, at times cryptically, the journey of its author through the strands of It that he himself has encountered. Strands passing across history, through literature and religious texts and philosophies, and even into the legends of the world. It can easily be seen as the tale of unknown centuries of people easily manipulated by virtue of what they wish to have and how they are taught or led to obtain it, along with what they are oftentimes kept willingly ignorant of as they unknowingly push an apparently undying school of thought and way of life crashing forward through time. It is not so much the story of some grand conspiracy as it is the story of people blinded by imagined desires and glories. Individuals working at the same time, but neither with or without the perceived aid of each other down the path to attaining. It contains a strand of common legends, stories, lessons, and teachings that are somehow known the world over. Stories of once great empires and their cities and peoples now long forgotten, at least one great war, masters who exploited mass populations kept in ignorance, of the same monumental disasters, and of the destruction of it all over and over so that another chance can be given to creation along with the chance to finally build a truly eternal civilization and culture, and more.

For 365 days during 2005-2006, Revs. Deborah and Paul Phelps allowed their minds to be open to the Voice of God and to receive His messages. By simply utilizing their daily life situations as conversation topics with the Holy Spirit, they found that their healing increased by the simple act of practical application of the ideas of forgiveness in A Course in Miracles. These personal messages were written daily and

now shared with many.

distress call from Alpha Centauri? No problem: punch the warp drive and you're there in minutes. Facing a catastrophe that can't be averted? Just pop back in the timestream and stop it before it starts. But for those of us not lucky enough to live in a science-fictional universe, are these ideas merely flights of fancy—or could it really be possible to travel through time or take shortcuts between stars? Cutting-edge physics may not be able to answer those questions yet, but it does offer up some tantalizing possibilities. In Time Travel and Warp Drives, Allen Everett and Thomas A. Roman take readers on a clear, concise tour of our current understanding of the nature of time and space—and whether or not we might be able to bend them to our will. Using no math beyond high school algebra, the authors lay out an approachable explanation of Einstein's special relativity, then move through the fundamental differences between traveling forward and backward in time and the surprising theoretical connection between

going back in time and traveling faster than the speed of light. They survey a variety of possible time machines and warp drives, including wormholes and warp bubbles, and, in a dizzyingly creative chapter, imagine the paradoxes that could plague a world where time travel was possible—killing your own grandfather is only one of them! Written with a light touch and an irrepressible love of the fun of sci-fi scenarios—but firmly rooted in the most up-to-date science, *Time Travel and Warp Drives* will be a delightful discovery for any science buff or armchair chrononaut.

Have you ever looked up at the stars and wondered what you were really seeing? Do you often stop to ponder why we are all here; what we are all made of; where we might be headed? Moreover, have you ever tried to find the answers to these questions, but been overwhelmed by both the complexity and the wealth of knowledge available? While we are privileged to live in such a time where knowledge is readily available, the sheer amount and depth involved can be overwhelming. Intended for the average person, *Journey Through Time* answers all of the questions you never thought you'd be able to understand in a manner that is meaningful, informative, exciting, but most importantly, easy to understand. The book journeys from the very beginning - The Big Bang - to the present day, and is packed with everyday examples that make vast concepts and mathematical questions accessible. While the author wonders about the intriguing future that awaits in two thousand, three thousand years, he firmly believes that it's crucial to attempt to understand our past fully first. Ideal for the curious reader who has been 'put off' in the past by the complex works of past scientists, but who wants to learn more.

"How many stars were found on the American flag flying from Titanic's mast? How many dogs were on board? Why was Titanic's helmsman prevented from seeing the approaching iceberg? The answers to these questions, and many more, are in this book which is based on research from three continents using original and archival sources. It comprises snapshots of more than 250 dates, from the births of the key players in this tragedy to the latest expedition to recover artefacts; a chronology of the ship's final hours, with exact times assigned to each event based on current scientific examination of the wreck; an account of how the public learned the news of the sinking, and also of the court hearings to establish ownership rights to the wreck."--Publisher description.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of

business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.
