Learning  
Starting Out with  
Programming Logic and  
Design, Third Edition, is a  
language-independent  
introductory programming  
book that orients students to  
programming concepts and  
logic without assuming any  
previous programming  
experience. In the  
successful, accessible style  
of Tony Gaddis' best-selling  
texts, useful examples and  
detail-oriented explanations  
allow students to become

comfortable with fundamental  
concepts and logical thought  
processes used in  
programming without the  
complication of language  
syntax. Students gain  
confidence in their program  
design skills to transition into  
more comprehensive  
programming courses. The  
book is ideal for a  
programming logic course  
taught as a precursor to a  
language-specific  
introductory programming  
course, or for the first part of  
an introductory programming  
course.

Java Programming  
Introductory is  
designed to guide you,  
the beginning  
programmer, in  
developing  
applications and  
applets using the Java  
programming language.  
It introduces you to  
object-oriented  
programming concepts  
along with the Java  
syntax you need to  
implement them. In  
this book, you build  
applications and  
applets from the  
bottom up, rather than  
using prewritten

objects. This book will  
teach you how to create  
and modify simple Java  
language applications  
and applets and provide  
you with the tools to  
create more complex  
examples.
