In Learning Targets, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"--or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book \* Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. \* Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. \* Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. \* Shows how to use learning targets to guide summative assessment and grading. Learning Targets also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning. A Study Guide for Titus Lucretius Carus's "De rerum natura (On the Nature of Things)" Everbind We know more of Marcus Tullius Cicero (106-43 BCE), lawyer, orator, politician and philosopher, than of any other Roman. Besides much else, his work conveys the turmoil of his time, and the part he played in a period that saw the rise and fall of Julius Caesar in a tottering republic. Cicero (Marcus Tullius, 106-43 BCE), Roman lawyer, orator, politician and philosopher, of whom we know more than of any other Roman, lived through the stirring era which saw the rise, dictatorship, and death of Julius Caesar in a tottering republic. In his political speeches especially and in his correspondence we see the excitement, tension and intrigue of politics and the part he played in the turmoil of the time. Of about 106 speeches, delivered before the Roman people or the Senate if they were political, before jurors if judicial, 58 survive (a few of them incompletely). In the fourteenth century Petrarch and other Italian humanists discovered manuscripts containing more than 900 letters of which more than 800 were written by Cicero and nearly 100 by others to him. These afford a revelation of the man all the more striking because most were not written for publication. Six rhetorical works survive and another in fragments. Philosophical works include seven extant major compositions and a number of others; and some lost. There is also poetry, some original, some as translations from the Greek. **De Officiis Spark Notes**

To tell the story, Williams turned to the epistolary novel, a genre that was new to him, transforming and transcending it just as he did the western in *Butcher ’ s Crossing* and the campus novel in *Stoner*. *Augustus* is the final triumph of a writer who has come to be recognized around the world as an American master.
