Jump math was founded in the belief that all children, even those who have traditionally struggled at school, can learn mathematics. The JUMP Math student assessment & practice books are meant to be used in conjunction with the extensive teacher resources to enable students to practice and explore subtle variations on the lessons and to enable teachers to rapidly assess progress. For each lesson, there is a clear and highly effective lesson plan, which enables teachers to accomplish the seemingly impossible task of teaching to the whole class while tailoring to individual needs. Each lesson is carefully

designed to generate deep, subtle, transferable mastery of key concepts. Lesson plans include ideas for contextualizing the math, questions and tasks that allow students to discover mathematical concepts, games, activities, and innovative extension questions that keep "fast" students engaged and learning while teachers help others to master the key objectives.

John Mighton's revolutionary JUMP at Home: Grade 4 workbook, now available as a PDF for the first time for at-home learning. "John Mighton's JUMP program has demonstrated powerfully that, with the right instruction, no one need be left behind in math." — New York Times John Mighton's innovative JUMP (Junior Undiscovered Math Prodigies) Math program is changing the way math is taught. With these workbooks, parents and caregivers can bring the JUMP program home to keep children learning. The key to the enormous success of the

program is a step-by-step teaching method that isolates and describes concepts so clearly that children can not only understand them, but also build up great confidence in themselves and their ability. This workbook includes an introduction that clearly explains the thinking behind the program and follows the carefully designed worksheets used by JUMP tutors and classroom teachers. Royalties from the sales of the JUMP workbooks are donated to the JUMP organization.
