Poverty, Politics, and Race gives a true face to poverty, while knocking down stereotypes on race and the poor; and sheds light on how the politics of the past and present have magnified issues of race in America. The book also gives a personal look back at an important period in civil rights in America's history and sounds an alarm at the renewed and very open racial hatred that resurfaced with the election of the first African-American U.S. President. It takes a critical look at current events affecting the lives of average Americans through the prism of a Black woman who has experienced firsthand the effects of poverty, race, and the politics surrounding both issues. The book hopefully will help remove the blinders and lead to a more honest discussion on the divisions in our country and ways we can begin to heal them.

Your child will learn to identify short- and long-term goals, and come to see how good study habits can help him achieve those goals. With this book, your child can get through school with flying colors!

This book contains refereed and improved papers presented at the 8th IAPR Workshop on Graphics Recognition (GREC 2009), held in La Rochelle, France, July 22-23, 2009. The GREC workshops provide an excellent opportunity for researchers and practitioners at all levels of experience to meet colleagues and to share new ideas and knowledge about graphics recognition methods. Graphics recognition is a subfield of document image analysis that deals with graphical entities in engineering drawings, sketches, maps, architectural plans, musical scores, mathematical notation, tables, diagrams, etc. GREC 2009 continued the tradition of past workshops held in the Penn State University, USA (GREC 1995, LNCS Volume 1072, Springer Verlag, 1996); Nancy, France (GREC 1997, LNCS Volume 1389, Springer Verlag, 1998); Jaipur, India (GREC 1999, LNCS Volume 1941, Springer Verlag, 2000); Kingston, Canada (GREC 2001, LNCS Volume 2390, Springer Verlag, 2002); Barcelona, Spain (GREC 2003, LNCS Volume 3088, Springer Verlag, 2004); Hong Kong, China (GREC 2005, LNCS Volume 3926, Springer Verlag, 2006); and (GREC 2007, LNCS Volume 5046, Springer Verlag, 2008). The program of GREC 2009 was organized in a single-track 2-day workshop. It comprised several sessions dedicated to specific topics. For each session, there was an invited presentation describing the state of the art and stating the open questions for the session's topic, followed by a number of short presentations that contributed by proposing solutions to some of the questions or by presenting results of the speaker's work. Each session was then concluded by a panel discussion.

In *The Conversation That Matters Most*, DeWitt Rowe takes his readers on a unique and fascinating journey of self-exploration and discovery. The author not only guides us toward a complete reevaluation of how we view success; he convinces us that the way we define it and pursue it must also be reexamined. How often do we stop and question the assumptions that have defined us? Are we more intelligent than we have been led to believe? Do our idiosyncrasies make us strange...or simply unique? How often do we make a decision based on what's expected of us, rather than on our innate sense of what works? DeWitt delves into areas that are rarely

discussed, areas that reward us with a richness of comprehension, awareness, discovery, and wisdom. Every page is a reminder of the control we have over our lives if only we can understand how to use that control in a positive and result-oriented manner. Utilizing this book's guides and lessons, we can be assured of a fuller and more satisfying life.

Shifting faculty roles in a changing landscape Ernest L. Boyer's landmark book *Scholarship Reconsidered: Priorities of the Professoriate* challenged the publish-or-perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how *Scholarship Reconsidered* applies today.
