The State of the World 's Children 2016, a UNICEF flagship report, argues that progress for the most disadvantaged children and families is the defining condition for delivering on the 2030 Sustainable Development Goals. Millions of children 's lives around the world are blighted for no reason other than the country, gender or circumstances into which they are born. Failure to reach them now will fuel intergenerational cycles of disadvantage that will imperil their future and the future of the world. We have a clear choice to make: Invest in accelerated progress for the children being left behind, or face the consequences of a far more divided and unfair world by 2030.

Forests and Globalization Cambridge University Press

One of our "best known and most influential business scholars" (Boston Globe), best-selling author Rosabeth Moss Kanter tackles America 's most urgent domestic issue. Americans are stuck. We live with travel delays on congested roads, shipping delays on clogged railways, and delays on repairs, project approvals, and funding due to gridlocked leadership. These delays affect us all, whether you are a daily commuter, a frequent flyer, an entrepreneur, an online shopper, a job-seeker, or a community leader. If people can't move, if goods are delayed, and if information networks can't connect, then economic opportunity deteriorates and social inequity grows. We have been stuck for too long, writes Harvard Business School professor and best-selling author Rosabeth Moss Kanter. In *Move*, Kanter visits cities and states across the country to tackle our challenges—and reveal solutions—on the roads and rails, and in our cities, skies, and the halls of Washington, D.C. We meet a visionary engineer and public servant spearheading an underwater tunnel in Miami to streamline port operations and redirect constant traffic from the city center. We see mayors partnering with large corporations and nimble entrepreneurs to unveil parking apps, bike-sharing programs, and seamless Wi-Fi networks in greener, more vibrant, more connected cities. And we learn about much-needed efforts—such as dynamic tolls on highways and fees based on vehicle miles traveled—to reduce our dependence on the outmoded gasoline tax in our new electric car age. It all adds up to a new vision for American mobility, where local leaders shape initiatives without waiting for Congress to act, and ambitious companies partner with governments to tackle projects that serve the public good, create jobs, and improve quality of life while providing healthy sources of investment. With unique insight and unrivaled expertise, Kanter gives us a sweeping look across America, revealing the innovative projects, vital leaders, and bold solutions that are moving our transportation infrastructure toward a cleaner, faster, and more prosperous future.

News Media and Public Relations in the Digital Age Walter de Gruyter GmbH & Co KG

This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest

trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

Why Australians Don't Trust Politics Routledge

"Goes into extensive detail about the individual characters starting from their origins and their transition and evolution through the decades...makes for fascinating reading"--Collector's Corner. Comic book audience expectations have fluctuated dramatically through the years, and comic book creators have had to adapt to shifting reader concerns. One of Marvel Comic's most popular franchises for five decades, the Avengers have always been reflective of their times, having adapted to an evolving readership to remain relevant. This collection of fresh essays by popular culture scholars examines Avengers story lines such as the Korvac Saga, Civil War, and Secret Invasion, and scrutinizes key characters including the Black Panther and Hank Pym. Essays explore how real-world events such as the Cuban Missile Crisis, the Vietnam War, the end of the Cold War, and 9/11 influenced popular entertainment in America.

The Political Bubble Oxford University Press

Distinctive Styles and Authorship in Alternative Comics addresses the benefits and limits of analyses of style in alternative comics. It offers three close readings of works serially published between 1980 and 2018 – Art Spiegelman's Maus, Alison Bechdel's Dykes to Watch Out For, and Jason Lutes' Berlin – and discusses how artistic style may influence the ways in which readers construct authorship.

NTA UGC NET Paper 1 Topic-wise 52 Solved Papers (2020 to 2004) 2nd Edition Petrogav International

High energy costs contribute to dampening Caribbean competitiveness and potential growth. This paper overviews power sector challenges and takes stock of national and regional strategies to address them. It presents recommendations to move the energy agenda forward based on analyses of macro-aspects of energy reform. These include: i) quantitative assessment of the impact of energy costs on growth and competitiveness; ii) evaluation of gains from implementing announced renewable energy and energy efficiency targets; and iii) analysis of the impact of energy

investments on debt sustainability. The paper argues for a bigger role for the private sector in energy reform and discusses prerequisites for good public-private partnerships.

The Routledge Companion to Digital Humanities and Art History Oxford University Press

This book provides a comparative assessment of the material and ideational contributions of five countries to the regional architecture of post-Cold War Asia. In contrast to the usual emphasis placed on the role and centrality of the Association of Southeast Asian Nations (ASEAN) in Asia's multilateral architecture and its component institutions, this book argues that the four non-ASEAN countries of interest here 3 / 4 Australia, Japan, China and the United States 3 / 4 and Indonesia have played and continue to play an influential part in determining the shape and substance of Asian multilateralism from its pre-inception to the present. The work does not contend that existing scholarship overstates ASEAN's significance to the successes and failures of Asia's multilateral enterprise. Rather, it claims that the impact of non-ASEAN stakeholders in innovating multilateral architecture in Asia has been understated. Whether ASEAN has fared well or poorly as a custodian of Asia's regional architecture, the fact remains that the countries considered here, notwithstanding their present discontent over the state of that architecture, are key to understanding the evolution of Asian multilateralism. This book will be of much interest to students of Asian politics, international organisations, security studies and IR more generally.

Essays on the Earth's Mightiest Heroes in Changing Times Penguin

This book employs a transitional justice lens to address the 'disappearances' that occurred during the Northern Ireland conflict – or 'Troubles' – and the post-conflict response to these 'disappearances.' Despite an extensive literature around 'dealing with the past' in Northern Ireland, as well as a substantial body of scholarship on 'disappearances' in other national contexts, there has been little scholarly scrutiny of 'disappearances' in post-conflict Northern Ireland. Although the Good Friday Agreement brought relative peace to Northern Ireland, no provision was made for the establishment of some form of overarching truth and reconciliation commission aimed at comprehensively addressing the legacy of violence.

Nevertheless, a mechanism to recover the remains of the 'disappeared' – the Independent Commission for the Location of Victims' Remains (ICLVR) – was established, and has in fact proven to be quite effective. As a result, the reactions of key constituencies to the 'disappearances' can be used as a prism through which to comprehensively explore issues of relevance to transitional justice scholars and practitioners. Pursuing an interdisciplinary approach, and based on extensive empirical research, this book provides a multifaceted exploration of the responses of these constituencies to the practice of 'disappearing.' It engages with transitional justice themes including silence, memory, truth, acknowledgement, and apology. Key issues examined include the mobilisation efforts of families of the 'disappeared,' efforts by a (former) non-state armed group to address its legacy of violence, the utility of a limited immunity mechanism to incentivise information

provision, and the interplay between silence and memory in the shaping of a collective, societal understanding of the 'disappeared.'

Rethinking Donor Assistance to Developing and Transitional Countries Routledge

With advances in technology and maritime transport, human use of the ocean now extends beyond the traditional activities of navigation and fishing. Emerging activities such as bioprospecting, deep seabed mineral and hydrocarbon exploration and exploitation, offshore renewable energy developments and marine scientific probes of deep sea areas challenge the applicability of maritime law and policy in new ways. This handbook examines current regulatory and enforcement instruments and mechanisms for different sectors of maritime activity. Covering various jurisdictions, its specially commissioned chapters are authored by some of the world's foremost authorities on maritime law, and offer unique perspectives on maritime law, policy and practice. This highly relevant collection is organised into four parts:

- International Law Considerations in Maritime Regulation and Enforcement
- Role of States and other International Actors in Maritime Regulation and Enforcement
- Regulation and Enforcement in Different Maritime Sectors
- Current Issues and Future Challenges

This comprehensive reference work will be of interest to scholars and students of maritime law, practitioners and non-lawyers interested in the regulation of offshore areas, as well as policy-makers.

GPA NEWS June 2013 Academic Press

In this moving and controversial Quarterly Essay, doctor and writer Karen Hitchcock investigates the treatment of the elderly and dying through some unforgettable cases. With honesty and deep experience, she looks at end-of-life decisions, frailty and dementia, over-treatment and escalating costs. Ours is a society in which ageism, often disguised, threatens to turn the elderly into a "burden" – difficult, hopeless, expensive and homogenous. While we rightly seek to curb treatment when it is futile, harmful or against a patient's wishes, this can sometimes lead to limits on care that suit the system rather than the person. Doctors may declare a situation hopeless when it may not be so. We must plan for a future when more of us will be old, Hitchcock argues, with the aim of making that time better, not shorter. And we must change our institutions and society to meet the needs of an ageing population. Dear Life is a landmark essay by one of Australia's most powerful writers. "The elderly, the frail are our society. They are our parents and grandparents, our carers and neighbours, and they are every one of us in the not-too-distant future . . . They are not a growing cost to be managed or a burden to be shifted or a horror to be hidden away, but people whose needs require us to change." —Karen Hitchcock, Dear Life

A Time for Choosing Springer

This is the most comprehensive and up-to-date reference for implementing and sustaining superior corporate governance. Stanford corporate governance experts David Larcker and Bryan Tayan carefully synthesize current academic and professional research, summarizing what is known and unknown, and where the evidence remains inconclusive. Corporate Governance Matters, Second Edition reviews the field's newest research on issues including compensation, CEO labor markets, board structure, succession, risk, international governance, reporting, audit, institutional and activist investors, governance ratings, and much more. Larcker and Tayan offer models and frameworks demonstrating how the components of governance fit together, with updated examples and scenarios illustrating key points.

Throughout, their balanced approach is focused strictly on

two goals: to "get the story straight," and to provide useful tools for making better, more informed decisions. This edition presents new or expanded coverage of key issues ranging from risk management and shareholder activism to alternative corporate governance structures. It also adds new examples, scenarios, and classroom elements, making this text even more useful in academic settings. For all directors, business leaders, public policymakers, investors, stakeholders, and MBA faculty and students concerned with effective corporate governance.

The broken promise of a Labor generation

International Monetary Fund

This compelling, theoretically informed and up-to-date exploration of contemporary American cinema charts the evolution of the impact of 9/11 on Hollywood film from Black Hawk Down (2001), through Batman Begins (2005), United 93 (2006) to Olympus Has Fallen (2013). Through a vibrant analysis of a range of genres and films - which in turn reveal a strikingly diverse array of social, historical and political perspectives - this book explores the impact of 9/11 and the war on terror on American cinema in the first decade of the new millennium and beyond.

Putting America's Infrastructure Back in the Lead Routledge

The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 288 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Macro-Related Challenges Petrogav International

In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A

Danger, Development and Legitimacy in East Asian Maritime Politics SUNY Press

The overarching contribution of this book is a review and assessment of the current and future impacts of globalization on the world's forests. The work has been developed by the "Resources for the Future" Task Force for the International Union of Forest Research Organizations (IUFRO). Four key themes are addressed: the effect of globalization on forests (including future trade flows); plantations as the primary source of forest products and its consequences, including plant breeding and forest health; the effect of new products such as bio-products and markets on forests; and the emergence of forest ecosystem services and their impact on the landscape and human communities. These four themes are examined in detail to map out the impacts of these trends for forests throughout the world and at multiple scales, and how forest research needs to be adapted to address these trends. Overall, the volume provides a major synthesis of current thinking and knowledge on the topic for advanced students, as well as policy-makers and professionals in the forest sector.

Grounded in extensive empirical research, *Danger, Development and Legitimacy in East Asian Maritime Politics* addresses the major issues of geopolitics in the region that have been and will continue to shape the international politics of the Asia-Pacific for years to come. Covering the nation-states of China, Japan and South Korea, it includes an examination of the key island disputes, as well as analysis of the North Korea–South Korea clashes in the Yellow Sea, controversies in Japan's relations with both Koreas and the so-called 'history disputes', including recognition of World War II atrocities across the region. In doing so, this book explores a range of themes from the ecological environment to the globalized nature of shipping and therein links the East Asian maritime sphere directly to the dynamics and developments in the domestic politics of each country. Thus, it serves to demonstrate how several controversial debates in the international politics of the Asia-Pacific are ultimately and inextricably intertwined. A timely contribution that furthers our understanding of contemporary politics of the Asia-Pacific, this book will be of great interest to students and scholars of Asian politics, international relations and the Asia-Pacific region in general.

Triumph and Demise Black Inc.

From the chief economic commentator for the Financial Times—a brilliant tour d'horizon of the new global economy—There have been many books that have sought to explain the causes and courses of the financial and economic crisis that began in 2007. *The Shifts and the Shocks* is not another detailed history of the crisis but is the most persuasive and complete account yet published of what the crisis should teach us about modern economies and economics. Written with all the intellectual command and trenchant judgment that have made Martin Wolf one of the world's most influential economic commentators, *The Shifts and the Shocks* matches impressive analysis with no-holds-barred criticism and persuasive prescription for a more stable future. It is a book no one with an interest in global affairs will want to neglect.

Crisis and Promise in the Caribbean Routledge

Featuring a new introduction in response to Julia Gillard's memoir, this revised edition brings Paul Kelly's masterpiece on the Rudd-Gillard years up to the present. Drawing on more than sixty on-the-record interviews with all the major players, *Triumph and Demise* is full of remarkable disclosures. It is the inside account of the hopes, achievements and bitter failures of the Labor Government from 2007 to 2013. Kevin Rudd and Julia Gillard came together to defeat John Howard, formed a brilliant partnership and raised the hopes of the nation. Yet they fell into tension and then hostility under the pressures of politics and policy. Veteran journalist Paul Kelly probes the dynamics of the Rudd-Gillard partnership and dissects what tore them apart. He tells the full story of Julia Gillard's tragedy as our first female prime minister—her character, Rudd's destabilisation, the carbon tax saga and how Gillard was finally pulled down on the eve of the 2013 election. Kelly documents the most misunderstood event in these years—the rise of Tony Abbott and the reason for his success. It was Abbott's performance that denied Rudd and Gillard the chance to recover. Labor misjudged Abbott and paid the price. Kelly writes with a keen eye and fearless determination. His central theme is that Australian politics has entered a crisis of the system that, unless corrected, will diminish
