Al-shabaab And Boko Haram: Guerrilla Insurgency Or Strategic Terrorism? Springer  
Boko Haram is now the deadliest 'terrorist' organization operational in the world, by virtue of the sheer number of people the group have killed. Together with al-Shabaab, the two groups account for a substantial amount of carnage on the African continent. Analyzed here are the ideologies of these two infamous organizations. Utilizing information from breadcrumbs that they leave behind, in videos, media releases and various correspondence, this book searches for clues within the historical and contemporary social context that explain their existence. It explores the ideological roots the two organizations share and examines the goals and objectives of each group in order to calculate the nature of the threat posed in the broader international realm. It is argued that through applying strategic theory, and specifically the concept of strategic terrorism, it is possible to form a deeper understanding of two of the most dangerous militant organizations in operation today.

You think you know why our government in Washington is broken, but you really don't. You think it's broken because politicians curry favor with special interests and activists of the Left or Right. There's something to that and it helps explain why these politicians can't find common ground, but it misses the root cause. A half century ago, elected officials in Congress and the White House figured out a new system for enacting laws and spending programs--one that lets them take credit for promising good news while avoiding blame for government producing bad results. With five key tricks, politicians of both parties now avoid accounting to us for what government actually does to us. While you understand that these politicians seem to pull rabbits out of hats, hardly anyone sees the sleight of hand by which they get away with their tricks. Otherwise, their tricks wouldn't work. DC Confidential exposes the sleights of hand. Once they are brought to light, we can stop the tricks, fix our broken government, and make Washington work for us once again. The book explains the necessary reform and lays out an action plan to

put it in place. Stopping the tricks would be a constructive, inclusive response to the anger that Americans from across the political spectrum feel toward what should be our government.

Discover the underdog story of the improbable rise of small-batch distilling in America. This bracingly written, fast-paced work traces the relationship of Americans to spirits such as bourbon, scotch, vodka, gin, and rum. And it presents the full story of a plucky band of entrepreneurs who disrupted the nation's conception of how those libations could appear and taste—and how much they could cost. Acitelli weaves the unlikely triumph of the small-batch distilling movement into other major trends, including a neo-Prohibitionism that nearly croaked the entire thing, America's re-embrace of cocktails, and the twin rises of craft beer and fine wine. He also expertly delves into the

controversies currently wracking American spirits, ones that threaten to tank the movement at the moment of what should be its greatest triumph.

This book tackles the challenging topic of corruption. It explores the evolution of a global prohibition regime against corrupt activity (the global anti-corruption regime). It analyses the structure of the transnational legal framework against corruption, evaluating the impact of global anti-corruption efforts at a national level. The book focuses on the United Nations Convention against Corruption (UNCAC) as the primary tool of the global anti-corruption regime. It provides new and engaging material gathered in the field, including first-hand accounts from actors at international, regional, and domestic levels. Meticulously researched and written by Dr Amer K. Hirmis the book takes readers 6000 years back to early Mesopotamian polity, culture, and religious codes which shaped the economy, and continue to shape much of the body of Iraq's polity, economy and society today. Economic inefficiency, inequality and lack of sufficient employment are common threads that run throughout Mesopotamian/Iraqi economic history. The persistence of poverty, high unemployment, conscious discrimination against women, and a polity dictating blind allegiance and obedience from the subjects to the ruler, denied the Iraqis achieving economic development, the ultimate aim of which is the sustained improvement of the well-being of the people. Even when economic growth was attained, it was desperately non-inclusive. With a novel approach to economic development, this book examines Iraq's economy over the past 100 years. It establishes the historical roots in the consumption patterns, nature of the producers, the economic structure, trade, monetary and fiscal policy and resource allocation. In all these areas the echoes from the ancient past are striking. The principles of Sumerian taxes are still applied in present-day Iraq. The book proposes a set of conditions, which will need to be created for Iraq to achieve economic development and functional democracy, in the distant future.

Unsettled History examines South African society and the construction and presentation of its public pasts, from Nelson Mandela ' s release from prison in 1990 to South Africa ' s hosting of the 2010 FIFA World Cup ®. Conventionally represented as a time of rectifying the silences and distortions of settler history through inclusion and recovery, the focus here instead is on the shifts in processes and locations of historicizing and the unsettled state of categories of framing history in post-apartheid South Africa. This era saw fundamental transformations in the order of knowledge: from the academy to the public; from popular history to public history; from history-as-lesson to history-as-forum. Leslie Witz, Gary Minkley, and Ciraj Rassool take the reader to sites of historical production in which complex ideas about pasts are invoked, and navigate a path toward understanding the agencies of image-making and memory production. This volume is the outcome of the authors ' intensive collaborative research and engagement over twenty-five years on questions including the production and performance of apartheid history; the cultural politics of social history; South Africa ' s Truth and Reconciliation Commission and practices of orality; tourism as an arena of image-making and historical construction; museums as sites of heritage production for a new South Africa; photographs, archival meanings, and the construction of the social documentary; and the centenary commemorations of the South African War and the making of race. The authors not only witnessed many of these instances of history-making but were also participants in their constitution.

Within corporate governance the accountability of the board of directors is identified as a major issue by governments, international bodies, professional associations and academic literature. Boards are given significant power in companies, and as a consequence it is argued that they should be accountable for their actions. Drawing on political science, public administration, accounting, and ethics literature, this book examines the concept of accountability and its meaning in the corporate governance context. It examines the rationale for making boards accountable, and outlines the obstacles and drawbacks involved in providing for accountability. The book goes on to examine how current mechanisms for ensuring accountability are assessed in terms of fairness, justice, transparency, practicality, effectiveness and efficiency, before discussing the ways that accountability might be improved. Andrew Keay argues that enhanced accountability can provide better corporate governance, helping to reduce the frequency and severity of financial crises, and improve confidence in company practice. As an in depth study of a key element within the exercise of authority and management in corporate entities, this book will be of great use and interest to researchers and students of corporate governance, business and management, and corporate social responsibility.
