In the context of outcomes-based school governance, statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school, instructional, and professional development. However, very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level, and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view. Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.

To learn more about learning – what it is and how it works – it is necessary to look inside education. Inside Education takes the reader on a journey of four 'live' education projects: the first all-Irish speaking, mixed-gendered, multi-faith primary school in the Republic of Ireland ideally suited to exploring learning identity; an alternative post-primary school for those who leave (or are left behind by) the formal education system also based in the Republic of Ireland and ideally suited to exploring personal learning; an early college school that enables students to simultaneously sit their high-school diploma and college exams based in Queens, New York and ideally suited to exploring learning success; and an adult education training centre that works with 'landless' movement members based in Brazil and ideally suited to exploring learning power. Using a critical ethnography approach, each research narrative naturally unfolds/enfolds to tell a more complete learning story. All those interested in education are primed readers. By (re-)viewing their own learning outlook, they may begin to advance deeper critical ideas and debates in education. They may come to (re-)represent education, reminding public consciousness of its human stories, as well as its curious, intricate and powerful qualities. And they may (re-)discover 'other' roads to raise a scholar. Teachers, educational researchers, parents and guardians will be particularly interested readers. 'Inside Education is a thought-provoking, challenging and revealing journey inside the world of education and learning. Its exploration of school and classroom practices in a range of different settings provides important insights into how we learn ? a central aspect of our education system which remains overlooked and understudied. In doing so, it lays down a challenge to policy-makers and educators everywhere to think differently about the way we learn and, ultimately, help students fulfil their real potential.' -Carl O'Brien, Chief Reporter for The Irish Times 'Inside Education is a stunning example of passionate scholarship that nonetheless refuses a redemptionist stance. The ethnography captures people and contexts and draws the reader into the four sites of learning in fluent and lyrical prose. This is facilitated by the extensive use of research notes deploying historical, comparative, literary, artistic and scholarly sources.' -Denis O'Sullivan, Emeritus Professor of Education, University College Cork, Ireland *Le Verbe. Qu'est-Ce que C'est?* Disha Publications This book constitutes the thoroughly refereed proceedings of the 8th International Conference on Computer Supported Education, CSEDU 2016, held in Rome, Italy, in April 2016. The 29 revised full papers were carefully reviewed and selected from 164 submissions. The papers deal with the following topics: new educational environments, best practices and case studies of innovative technology-based learning strategies, institutional policies on computer-supported education including open and distance education. *8th International Conference, CSEDU 2016, Rome, Italy, April 21-23, 2016, Revised Selected Papers* SAGE In this book, Joanna Baumgart offers a detailed and innovative account of how a mixed methods approach, combining corpus linguistics and discourse analysis, can shed light on educational practice. Corpus Linguistics and Cross-Disciplinary Action Research is based on a 22,000-word corpus of mathematics lessons in a multicultural secondary school in Ireland with the analysis of classroom data supported by insights from reflective meetings with the participating teacher. It demonstrates how examination of video recordings of lessons and reflective conversations facilitate discursive changes in the classroom and increase teacher awareness of classroom interaction. Throughout, the role of teacher talk is used as a model in the subject-specific discourse into which students are socialized. Baumgart also relates the story of a successful interdisciplinary approach to action research, thereby providing an example of how talk and interaction can be examined within wider educational contexts. Building on the premise of the key role which language, and talk in particular, plays in teaching and learning processes, this book will be of keen interest to teacher-educators as well as researchers in the fields of corpus linguistics, discourse analysis and educational linguistics. *Developing Professional Learning Networks and School Communities* Independent Schools Yearbook 2012-2013 These books contain clear and comprehensive solutions to the Leaving Certificate Ordinary Exam Paper Questions for the last four years (2018, 2017, 2016 and 2015). unique handwritten solutions are easy to understand for the weaker student but will also provide the high flyer with the skills to hit the "H1" grade. There is one hundred and twenty three pages of the best notes in each book making it a competitive production at this price point. Each book contains the most detailed solutions of any Maths book on the market in Ireland and sets out every single line of the solution (step by step) with notes explaining the Maths behind them. The solutions encompass all topics on the course including Algebra, Calculus, Financial Maths, Complex Numbers, Geometry, Probability, Statistics, Trigonometry etc.. They also give an insight into the marking scheme of each paper. Students who regularly use these books negate the need to spend hundreds of Euro's on tuition, as many parents have commented to me over the years. Students can easily follow the stepped solutions on their own and subsequently learn how to apply it to a similar styled exam question later. The most efficient way for a student to use the book is to try each question part for themselves first and then subsequently refer to my solution to see where they have gone right or wrong; hence the student is always 'learning by doing'. Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education results from the Joint ICMI/IASE Study Teaching Statistics in School Mathematics: Challenges for Teaching and Teacher Education. Oriented to analyse the teaching of statistics in school and to recommend improvements in the training of mathematics teachers to encourage success in preparing statistically literate students, the volume provides a picture of the current situation in both the teaching of school statistics and the pre-service education of mathematics teachers. A primary goal of Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education is to describe the essential elements of statistics, teacher's professional knowledge and their learning experiences. Moreover, a research agenda that invites new research, while building from current knowledge, is developed. Recommendations about strategies and materials, available to train prospective teachers in university and in-service teachers who have not been adequately prepared, are also accessible to the reader.
