Have you ever met a child who talked like an adult? Who knew big words and how to use them? Was he a charmer or an insufferable smart aleck—or maybe both? Mark Oppenheimer was just such a boy, his talent for language as much as a blessing. But when he got to junior high, Oppenheimer discovered an outlet for his loquaciousness: the debate team. Frank and comical, Wisenheimer chronicles the travails of a hyperarticulate child who finds salvation in the heady world of competitive oratory. In stirring prose, Oppenheimer describes what it was like to have a gift with no useful application. Unlike math or music prodigies, he had no way to showcase his unique skill, except to speak like a miniature adult—a trick some found impressive but others found irritating. Frustrated and isolated, Oppenheimer used his powers for ill—he became a wisenheimer, pushing his peers and teachers away. Then, in junior high, he discovered the world he was meant for: the debate club. His skill with language was finally being channeled, refined, and honed into something beautiful. As Oppenheimer blossomed as a person, he also became a world-champion high school and college debater. His journey from loneliness to fulfillment affords a fascinating inside look at the extraordinary subculture of world-class high school debate and at the power of language to change one's life. Oppenheimer writes movingly about the art of rhetoric, of his passion for it, and of the inspiration he derived from debating and watching others do it. This smart, funny memoir not only reveals a strange, compelling subculture, it also offers a broader discussion of the splendor and power of language and of the social and developmental hazards of being a gifted child. Finally, it looks with hope at our present age, in which oratory

is once again an important force in American culture. Revealing, touching, and entertaining, Wisenheimer offers a brilliant portrait of the rarefied world of high school and college debate—and of what it's like to grow up talkative in America.

Created by Natan Last, a senior at Brown University, three-time intern with Will Shortz, and in 2008 the youngest person to have a puzzle published in the Sunday New York Times, Word kicks the crossword puzzle squarely into the 21st century for a new generation of puzzle-lovers, replacing fusty crossword-ese with hip cultural references, modern wordplay, and a lively mix of high-and low-brow pop trivia. A Word puzzle begins with the shared knowledge of a literate but not-so-reverent generation, and celebrates the knowingness with a deft touch. Your parents' crosswords make solvers feel smart. Word puzzles make solvers feel smart and cool, getting the references to The Daily Show, Mario Brothers, the Goo Goo Dolls, and a hefty dose of nostalgia (the name of the motel in Psycho). But they also know the core curriculum: Charlotte Bronte's Jane, Roman generals, Berlioz and von Bismarck, Homer—and not just Homer Simpson. The puzzles are constructed with all the smarts of a daily Times crossword: themes, interconnected clues, titles that unlock the overall puzzle (solve all the clues and the circle letters will spell out a famous name at Hogwarts). Assisting Mr. Last is a group of five more top "under 25" constructors, all of whom have published puzzles in The New York Times.

A fun way to combine math and reading. Students will build math skills as they solve the mysteries.

**Practical English, a Scholastic Magazine** Scholastic Professional Books

A classic he-said-she-said romantic comedy, with bonus content including a Q&A with the author. All I've ever wanted is for Juli Baker to leave me alone. For her to back off – you know, just give me some space. Juli has been making Bryce's life hell from the moment they met. All he wants is to live a normal life, without some crazy person mooning after him. The first day I met Bryce Loski, I flipped. Honestly, one look at him and I became a lunatic. It's his eyes. But she doesn't see it that way. In her eyes, they're meant for each other, even though he might not realize it yet. That is, until the eighth grade, when everything flips. And just as Juli starts to realize that Bryce may not be all he seemed, Bryce begins to think that there's more to Juli than meets the eye . . . Wendelin Van Draanen's Flipped is a modern-day classic about first love and not judging a book by its cover. A romantic comedy-of-errors told in alternating chapters by two fresh, funny voices.

Snippet is a typical snail. But unlike other snails, he loves to wake up early. While his family is snoozing the morning away, he is wide awake and ready to race to the flowers, make leaf sculptures, and get piggyback rides. With the help of his bug friends, he tries and tries to wake his family up—but nothing works. Until Caterpillar gives him an idea. Celebrating early birds and late snoozers alike, this story will ring true for the many families with little early risers. It's the perfect tale to fall asleep (or wake up!) to.

*Crossword Puzzles for the Weekend*

Science is continually confronted by new and difficult social and ethical problems. Some of these problems have arisen from the transformation of the academic science of the prewar period into the industrialized science of the present. Traditional theories of science are now widely recognized as obsolete. In *Scientific Knowledge and Its Social Problems* (originally published in 1971), Jerome R. Ravetz analyzes the work of science as the creation and investigation of problems. He demonstrates the role of choice and value judgment, and the inevitability of error, in scientific research. Ravetz's new introductory essay is a masterful statement of how our understanding of science has evolved over the last two decades.
