This book covers the methodological, epistemological and practical issues of integrating qualitative and socio-anthropological factors into archaeological modeling. This text fills the gap between conceptual modeling (which usually relies on narratives describing the life of a past community) and formalized/computer-based modeling which are usually environmentally-determined. Methods combining both environmental and

social issues through niche and agent-based modeling are presented. These methods help to translate data from paleo-environmental and archaeological society life cycles (such as climate and landscape changes) into the local spatial scale. The epistemological discussions will appeal to readers as well as the resilience socio-anthropological factors provide facing climatic fluctuations. Integrating Qualitative and Social Science

Factors in Archaeological Modelling will appeal to students and researchers in the field.

This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other

coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options,

conflicting information on how to use that equipment, and an industry language that, at times, doesn't seem made for the rest of us, it can be difficult to know where to begin. *Craft Coffee: A Manual*, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and

brewing techniques to choosing equipment and deciphering coffee bags, *Craft Coffee* focuses on the issues—cost, time, taste, and accessibility—that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . I really can't recommend *Craft Coffee: A Manual* enough. If you're even mildly curious about brewing coffee at home,

it's absolutely worth a read.”

Medical Eligibility Criteria for Contraceptive Use Cambridge University Press
This book focuses on the development of strategies for the successful internationalization of large and medium-sized companies. *Becoming international* offers important opportunities for companies of all sizes, but in an

increasingly complex environment, the strategic planning involved is also a challenge. The book addresses this, putting forward suggestions that allow large and medium-sized companies to profit from internationalization. After a comprehensive introduction to internationalization and strategic planning, the authors make clear recommendations, suggesting

detailed processes for developing international strategies. The book distinguishes between going global for new markets and internationalizing production and sourcing. For both, the book proposes procedures for performing meaningful strategic analyses and for developing successful international strategies. Lastly, it highlights the challenges faced by

international companies and discusses useful decision processes. The book offers valuable insights for company executives, participants in Executive MBA programs, and master's students. Crescendo of the Virtuoso

Presents a collection of recipes for a variety of hot and cold coffee beverages, baked goods, and desserts. Principles of Physical Geology John Wiley & Sons Medical Eligibility Criteria for Contraceptive Use reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic

reviews of available clinical and epidemiological research. It is a companion guideline to Selected Practice Recommendations for Contraceptive Use. Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs in the preparation of service delivery guidelines. The fourth edition of this useful resource supersedes previous editions, and has been fully updated and expanded. It includes over 86 new

recommendations and 165 updates to recommendations in the previous edition. Guidance for populations with special needs is now provided, and a new annex details evidence on drug interactions from concomitant use of antiretroviral therapies and hormonal contraceptives. To assist users familiar with the third edition, new and updated recommendations are highlighted. Everyone involved in providing family planning services and contraception should have the fourth edition of Medical Eligibility Criteria for

Contraceptive Use at hand.
Developing International Strategies BRILL
This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from

a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms.

‘ Masterpieces of Swiss Entrepreneurship ’ brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global

listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success.

“ Masterpieces of Swiss Entrepreneurship ” provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. In this essential rereading of Spinoza's (1632-1677) philosophical and political writings, Negri positions this thinker within the historical context of the development of the modern state and its attendant political economy. Through a close examination of Spinoza, Negri reveals turn as unique among his contemporaries for his nondialectical approach to social organization in a

bourgeois age.

The Republican Alternative

seeks to move beyond the mere notion of scholarly inquiry into the republic—the subject of recent rediscovery by political historians interested in Europe's intellectual heritage—by investigating the practical similarities and differences between two early modern republics, as well as their self-images and interactions during the turbulent seventeenth and eighteenth centuries. Among the

world's most economically successful societies, Switzerland and the Netherlands laid much of the foundation for their prosperity during the early modern period discussed here. This volume attempts to clarify the special character of these two countries as they developed, including issues of religious plurality, the republican form of government, and an increasingly commercially-driven agrarian society. *Manual of Romance*

present volume is centered around three key areas of institutional integrity, primarily within the administration of justice: First, in a broader theoretical-interdisciplinary context the criteria of institutional independence are discussed. The second major issue is the relation of neutralized institutions to branches of government with reference to accountability. Thirdly, comparative experience

regarding judicial independence is discussed to determine techniques to enhance integrity. Coffee Arcadia Publishing Order of Battle of the United States Land Forces in the World War Handbook of Enology, Volume 1 John Wiley & Sons Applications of X-ray Computed Tomography in the Geosciences Autonomia The legacy of Alexander von Humboldt (1769 – 1859) looms large over the natural sciences. His 1799 – 1804 research expedition to

Central and South America with botanist Aimé Bonpland set the course for the great scientific surveys of the nineteenth century, and inspired such essayists and artists as Emerson, Goethe, Thoreau, Poe, and Church. The chronicles of the expedition were published in Paris after Humboldt's return, and first among them was the 1807 "Essay on the Geography of Plants." Among the most cited writings in natural history, after the works of Darwin and Wallace, this work appears here for the first time in a complete English-language

translation. Covering far more than its title implies, it represents the first articulation of an integrative “science of the earth,” encompassing most of today’s environmental sciences. Ecologist Stephen T. Jackson introduces the treatise and explains its enduring significance two centuries after its publication. **Judicial Integrity**

The Handbook of Psychophysiology has been the

authoritative resource for more than a quarter of a century. Since the third edition was published a decade ago, the field of psychophysiological science has seen significant advances, both in traditional measures such as electroencephalography, event-related brain potentials, and cardiovascular assessments, and in novel approaches and methods in behavioural epigenetics,

neuroimaging, psychoneuroimmunology, psychoneuroendocrinology, neuropsychology, behavioural genetics, connectivity analyses, and non-contact sensors. At the same time, a thoroughgoing interdisciplinary focus has emerged as essential to scientific progress. Emphasizing the need for multiple measures, careful experimental design, and logical

inference, the fourth edition of the Handbook provides updated and expanded coverage of approaches, methods, and analyses in the field. With state-of-the-art reviews of research in topical areas such as stress, emotion, development, language, psychopathology, and behavioural medicine, the Handbook remains the essential reference for students and

scientists in the behavioural, cognitive, and biological sciences. Subsurface Hydrology Psychology Press This book can be read like a series of short stories - the story of a steel worker who was laid off after twenty years in the same factory and who now struggles to support his family on unemployment benefits and a part-time job; the story of a trade unionist who finds his goals undermined by the changing nature of work; the story of a family from Algeria living in a housing estate in

the outskirts of Paris whose members have to cope with pervasive, everyday forms of racism; the story of a school teacher confronted with urban violence; and many others as well. Reading these stories enables one to understand these people's lives and the forms of social suffering which are part of them. And the reader will see that this book offers not only a distinctive method for analysing social life, but also another way of practising politics. Masterpieces of Swiss Entrepren
