Coffee: A Comprehensive Guide to the Bean, the Beverage, and the Industry offers a definitive guide to the many rich dimensions of the bean and the beverage around the world. Leading experts from business and academia consider coffee's history, global spread, cultivation, preparation, marketing, and the environmental and social issues surrounding it today. They discuss, for example, the impact of globalization; the many definitions of organic, direct trade, and fair trade; the health of female farmers; the relationships among shade, birds, and coffee; roasting as an art and a science; and where profits are made in the commodity chain. Drawing on interviews and the lives of people working in the business—from pickers and roasters to coffee bar owners and consumers—this book brings a compelling human side to the story.

The authors avoid romanticizing or demonizing any group in the business. They consider basic but widely misunderstood issues such as who adds value to the bean, the constraints of peasant life, and the impact of climate change. Moving beyond simple answers, they represent various participants in the supply chain and a range of opinions about problems and suggested solutions in the industry. Coffee offers a multidimensional examination of a deceptively everyday but extremely complex commodity that remains at the center of many millions of lives. Tracing coffee's journey from field to cup, this handbook to one of the world's favorite beverages is an essential guide for professionals, coffee lovers, and students alike. "Enchanting . . . An absorbing narrative of politics, ecology, and economics."--New York Times Book Review (Editor's Choice) Located between the Great Rift Valley and the Nile, the cloud forests in southwestern Ethiopia are the original home of Arabica, the most prevalent and superior of the two main species of coffee being cultivated today. Virtually unknown to European explorers, the Kafa region was

essentially off-limits to foreigners well into the twentieth century, which allowed the world's original coffee culture to develop in virtual isolation in the forests where the Kafa people continue to forage for wild coffee berries. Deftly blending in the long, fascinating history of our favorite drink, award-winning author Jeff Koehler takes readers from these forest beginnings along the spectacular journey of its spread around the globe. With caf é s on virtually every corner of every town in the world, coffee has never been so popular--nor tasted so good. Yet diseases and climate change are battering production in Latin America, where 85 percent of Arabica grows. As the industry tries to safeguard the species' future, breeders are returning to the original coffee forests, which are under threat and swiftly shrinking. "The forests around Kafa are not important just because they are the origin of a drink that means so much to so many," writes Koehler. "They are important because deep in their shady understory lies a key to saving the faltering coffee industry. They hold not just the past but also the future of coffee." "A must-read for coffee enthusiasts."--Smithsonian (Best of the Year) "Reads like an engaging multimystery detective novel."--Wall Street Journal "Fascinating . . . How a local crop transformed into a global commodity."--Real Simple (Best of the Month) Coffee is one of the largest and most valuable commodities in the world. This is the story of its origins, its history, and the threat to its future, by the IACP Award – winning author of Darjeeling.

From the French Quarter to the Algiers neighborhood, its famed vaulted cemeteries to its infamous Mardi Gras celebrations, New Orleans cannot escape its rich Voodoo tradition, which draws from a multitude of ethnic sources, including Africa, Latin America, Sicily, Ireland, France, and Native America. In The New Orleans Voodoo Handbook, initiated Vodou priest Kenaz Filan covers the practices, tools, and rituals of this system of worship as well as the many facets of its origins. Exploring the major figures of New Orleans Voodoo, such as Marie Laveau and Dr. John, as well as Creole cuisine and the wealth of musical inspiration surrounding the Mississippi Delta, Filan examines firsthand documents and historical records to uncover the truth behind many of the city 's legends and to explore the oft-discussed but little-understood practices of the root doctors, Voodoo queens, and spiritual figures of the Crescent City. Including recipes for magical oils, instructions for candle workings, methods of divination, and even directions to create gris-gris bags, mojo hands, and Voodoo dolls, Filan reveals how to call on the saints and spirits of Voodoo for love, money, retribution, justice, and healing.

A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the “ most distinctive French voice of his generation ” (The Washington Post), Three by Echenoz demonstrates the award-winning author ’ s extraordinary versatility and elegant yet playful style at its finest. “ A parodic thriller sparkling with wit ” (L ’ Humanit é), Big Blondes probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? “ Fluid, never forced...like a garment that fits beautifully even inside-out ” (Elle), Piano brings Dante ’ s Inferno to contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. Running is “ a small wonder of writing and humanity ” (L ’ Express)—a portrait of the legendary Czech athlete Emil Zátopek, who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillippe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit...
