During the early development and throughout the short history of green/conservation criminology, limited attention has been directed toward quantitative analyses of relevant environmental crime, law and justice concerns. While recognizing the importance of establishing a theory and terminology in the early stages of development, this book redresses this imbalance. The work features contributions that undertake empirical quantitative studies of green/conservation crime and justice issues by both conservation and green criminologists. The collection highlights the shared concerns of these groups within important forms of ecological crime and victimization, and illustrates the ways in which these approaches can be undertaken quantitatively. It includes quantitative conservation/green criminological studies that represent the work of both well-established scholars in these fields, along with studies by scholars whose works are less well-known and who are also contributing to shaping this area of research. The book presents a valuable contribution to the areas of Green and Conservation Criminology. It will appeal to academics and students working in these areas.

Comedy is a powerful contemporary source of influence and information. In the still-evolving digital era, the opportunity to consume and share comedy has never been as available. And yet, despite its vast cultural imprint, comedy is a little-understood vehicle for serious public engagement in urgent social justice issues – even though humor offers frames of hope and optimism that can encourage participation in social problems. Moreover, in the midst of a merger of entertainment and news in the contemporary information ecology, and a decline in perceptions of trust in government and traditional media institutions, comedy may be a unique force for change in pressing social justice challenges. Comedians who say something serious about the world while they make us laugh are capable of mobilizing the masses, focusing a critical lens on injustices, and injecting hope and optimism into seemingly hopeless problems. By combining communication and social justice frameworks with contemporary comedy examples, authors Caty Borum Chattoo and Lauren Feldman show us how comedy can help to serve as a vehicle of change. Through rich case studies, audience research, and interviews with comedians and social justice leaders and strategists, *A Comedian and an Activist Walk Into a Bar: The Serious Role of Comedy in Social Justice* explains how comedy – both in the entertainment marketplace and as cultural strategy – can engage audiences with issues such as global poverty, climate change, immigration, and sexual assault, and how activists work with comedy to reach and empower publics in the networked, participatory digital media age.

In this scintillating combination of critical race theory, social commentary, veganism, and gender analysis, media studies scholar Aph Ko offers a compelling vision of a reimagined social justice movement marked by a deconstruction of the conceptual framework that keeps activists silo-ed fighting their various oppressions—and one another. Through a subtle and extended examination of Jordan Peele ' s hit 2017 movie Get Out, Ko shows the many ways that white supremacist notions of animality and race exist through the consumption and exploitation of flesh. She demonstrates how a critical historical and social understanding of anti-Blackness can provide the pathway to genuine liberation. Highly readable, richly illustrated, and full of startling insights, Racism as Zoological Witchcraft is a brilliant example of the emerging discipline of Black veganism by one of its leading voices.
