This book gathers selected contributions presented at the Enzo Levi and XX Annual Meeting of the Fluid Dynamic Division of the Mexican Physical Society in 2014. The individual papers explore recent advances in experimental and theoretical fluid dynamics and are suitable for use in both teaching and research. The fluid dynamics applications covered include multiphase flows, convection, diffusion, heat transfer, rheology, granular materials, viscous flows, porous media flows, geophysics and astrophysics. The

contributions, some of which are introductory and avoid the use of complicated mathematics, are suitable for fourth-year undergraduate and graduate students. Accordingly, the book is of immense benefit to these students, as well as to scientists in the fields of physics, chemistry and engineering with an interest in fluid dynamics from experimental and theoretical points of view.

In 2006, about 69 million U.S. households had pets, giving homes to around 73.9 million dogs, 90.5 million cats, and 16.6 million birds, and spending more than 38 billion dollars on companion animals. As never before in history, our pets are truly members of the family. But the notion of “companion species”—knotted from human beings, animals and other organisms,

landscapes, and techno animal–human logies—includes much encounters. In this more than deeply personal yet “companion animals.” intellectually In *When Species Meet*, Donna J. This book provides an in-depth exploration of the field of augmented reality (AR) in its entirety and sets out to distinguish AR from other inter-related technologies like virtual reality (VR) and mixed reality (MR). The author presents AR from its initial philosophies and early developments, to its current technologies and its impact on our modern society, to

its possible future developments; providing readers with the tools to understand issues relating to defining, building, and using our perception of what is represented in our perceived reality, and ultimately how we assimilate and react to this information. **Augmented Reality: Where We Will All Live** can be used as a comprehensive guide to the field of AR and provides valuable insights for technologists, marketers, business managers,

educators and academics who are interested in the field of augmented reality; its concepts, history, practices and the science behind this rapidly advancing field of research and development.

designers share their real-life experiences to explain the aesthetic, narrative, and technical aspects of the craft. Step by step, aspiring filmmakers will discover sound instruction on the tools of the trade, and established filmmakers will enjoy a new outlook on production design. They will learn, for example, the craft behind movie magic—such as how to create a design metaphor, choose a color scheme, use space, and work within all genres of film, from well-funded studio projects to "guerilla filmmaking." This indispensable resource also

contains a history of movie making and guidelines for digital production design. For the experienced filmmaker seeking new design ideas to the struggling newcomer stretching low-budget dollars, this book makes the processes and concepts of production design accessible. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art,

photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.
