A passionate, detailed, quantified argument for state-level tax reform An Inquiry into the Nature and Causes of the Wealth of States explains why eliminating or lowering tax burdens at the state level leads to economic growth and wealth creation. A passionate argument for tax reform, the book shows that even states with small populations can benefit enormously with the right policies. The authors' detailed exposition evaluates the impact state and local government policies have on a state's relative performance and economic growth overall, backed up with

economic data and analysis. Facts don't lie. But they do point clearly to the failure of so-called progressive tax schemes designed more to curry favor with selected constituencies than to create an economic system that leads to individual wealth as the reward for hard work and entrepreneurial risk taking. An Inquiry into the Nature and Causes of the Wealth of States is a detailed and critical look at income taxation across the nation, and drills down into an analysis of the economic growth or malaise that results from tax policy. Arguing eloquently that a state cannot tax itself into prosperity, just as the impoverished cannot spend themselves into wealth, the authors point out what many inherently know but often fear to say out loud. The book provides detailed quantitative analysis, and discusses the policy variables that can have enormous effects on the financial well-being of states and individual residents, such as: Personal and corporate income tax rates Total tax burden as a percentage of personal income Estate and inheritance taxes Right-to-work laws An Inquiry into the Nature and Causes of the Wealth of States

shows everyone how to evaluate state-level fiscal and economic policies to become more competitive.

"Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77.

With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will

Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. Prahalad The targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable,

economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the world's major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

This lively collection of essays showcases recent research into the impact of the conflict on British women during the First World War and since. Looking outside of the familiar representations of wartime women as nurses, munitionettes, and land girls, it introduces the reader to lesser-known aspects of women's war experience, including female composers' musical responses to the war, changes in the culture of women's mourning dress, and the complex relationships between war, motherhood, and politics. Written during the war's centenary, the chapters also consider the gendered nature of war memory in Britain, exploring the emotional legacies of the conflict today, and the place of women's wartime stories on the contemporary stage. The collection brings together work by emerging and established scholars contributing to the shared project of rewriting British women's history of the First World War. It is an essential text for anyone researching or studying this history. This book was originally published as a special issue of *Women's History Review*.

An Inquiry into the Nature and Causes of the Wealth of States

The Luftwaffe was the official Nazi air force during World War II and The Luftwaffe Fighter Force features thirty-four accounts of its missions given by pilots and members of its flight crews. Stories included give a rarely heard perspective on the war and Luftwaffe members are frank in revealing the difficulties they encountered and what they believe led to their downfall. The Luftwaffe pilot and crew members featured in this unusual collection divulge what was once highly-confidential information, including fighter tactics, aircraft technology and operations, how they received their commands, and what the chain in carrying out their orders was. Also included are thirty rarely seen photographs and five maps and diagrams. Images feature things such as uniformed Luftwaffe officers, close-up shots of fighter planes, and the boundaries the planes were authorized to carry out their missions in. This unique volume was compiled by acclaimed military historian David C. Isby and is extraordinarily comprehensive. To make it, Isby poured over accounts of the war given by members of the Luftwaffe shortly after the events they describe. Much of the information in the book has been shared for the first time within it, and after a limited print run nearly twenty years ago, is finally, seventy years after the Luftwaffe missions, finally back in print. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national

bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.
