In 2000 Suzuki introduced the K6A 660cc engine, the main difference was this engine was chain driven instead of rubber timing belt drive. The K6A also uses pucks and shims between the engine valves and the cam shaft. This style of cam and valve train assembly makes it very difficult to adjust the valve lash clearance.

I used Mobile1 5W-30 Full Synthetic on my first and only oil change since having my truck and it took right at 3.5 qts with the filter. I have a 99' Suzuki with the F6A EFI engine. I tried just using three qts like I had read, but it was right at or just slightly above the add line. 3.5 qts did the trick and filled it completely.
