Introduction to Networks Companion Guide is the official supplemental textbook for the Introduction to Networks course in the Cisco® Networking Academy® CCNA® Routing and Switching curriculum. The course introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, you will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. The Companion Guide is designed as a portable desk reference to use anytime, anywhere to reinforce the material from the course and organize your time. The book's features help you focus on important concepts to succeed in this course: Chapter Objectives – Review core concepts by answering the focus questions listed at the beginning of each chapter. Key Terms – Refer to the lists of networking vocabulary introduced and highlighted in context in each chapter. Glossary – Consult the comprehensive Glossary with more than 195 terms. Summary of Activities and Labs – Maximize your study time with this complete list of all associated practice exercises at the end of each chapter. Check Your Understanding – Evaluate your readiness with the end-of-chapter questions that match the style of questions you see in the online course quizzes. The answer key explains each answer. Related Title: Introduction to Networks Lab Manual ISBN-10: 1-58713-312-1 ISBN-13: 978-1-58713-312-1 How To – Look for this icon to study the steps you need to learn to perform certain tasks. Interactive Activities – Reinforce your understanding of topics with more than 50 different exercises from the online course identified throughout the book with this icon. Videos – Watch the videos embedded within the online course. Packet Tracer Activities – Explore and visualize networking concepts using Packet Tracer exercises interspersed throughout the chapters. Hands-on Labs – Work through all 66 course labs and Class Activities that are included in the course and published in the separate Lab Manual. This book is part of the Cisco Networking Academy Series from Cisco Press®. Books in this series support and complement the Cisco Networking Academy curriculum.

Train your dog to reliably follow a human scent trail. Learn: - How to pick the right dog for tracking - What equipment you need - How to lay both simple and advanced tracks - The science of scent and your dog's nose. A well-trained tracking dog can be the deciding factor that determines success in both criminal investigations and search-and-rescue operations. When the stakes are high, demanding the highest level of performance from your K9, you need training methods relied upon by police forces and SAR teams around the world. Dr. Resi Gerritsen and Ruud Haak show you how to train your dog in clean-scent tracking, a proven method that trains dogs to follow a particular scent on a track, while ignoring cross-tracks and other odors. In K9 Professional Tracking, you'll learn how to train a clean-scent tracking dog you can count on. You'll also learn to fully understand what your K9 is and is not capable of in the field. With the right knowledge and techniques, you'll be able to train tracking dogs to

the highest professional standards.

This Cisco-authorized, self-paced foundation learning tool helps you prepare for both the 200-101 ICND2 and 200-120 CCNA exams. It delivers the higher level of foundational knowledge you need to prepare for the ICND2 exam (and the ICND2 components in the CCNA Composite exam), and to succeed in a wide range of Cisco networking job roles. This book teaches with numerous examples, illustrations, and real-world scenarios, helping you rapidly gain both expertise and confidence. Its coverage ranges from internetworking essentials to advanced diagnostic and debugging techniques that are needed by virtually all Cisco professionals. The book teaches you the technology and theory for building and troubleshooting medium to large scale internetworks, including an in-depth study of VLANs as well as redundancy technologies such as HSRP, STP, and EtherChannel. Additional topics include: implementing scalable mid-sized networks; troubleshooting basic connectivity; implementing EIGRP solutions and OSPF-based scalable multiarea networks; understanding WAN technologies; managing network devices; and advanced troubleshooting. This edition has been fully updated to reflect Cisco's latest exam blueprints. Content has been reorganized, simplified, and expanded to help you learn even more efficiently. The book presents you with information applicable to the CCNA that can't be found in any other CCNA text, including an overview and primer of MPLS, real-world examples, and real-world information on how to more effectively work with the Cisco TAC and diagnose software defects. The book also shows you how to use the Cisco 'Debug' command to learn how protocols work. Interconnecting Cisco Network Devices, Part 2 (ICND2) Foundation Learning Guide, Fourth Edition is part of a recommended learning path from Cisco that includes simulation and hands-on training from authorized Cisco Learning Partners and self-study products from Cisco Press. To find out more about instructor-led training, e-learning, and hands-on instruction from authorized Cisco Learning Partners worldwide, please visit www.cisco.com/go/authorizedtraining. Enhance your K9's detection capabilities and unlock the power of its nose with scent and odor line-up training. Learn how to: - Master the basics of detector dog training - Train dogs in scent identification line-ups and odor recognition tests - Troubleshoot common problems in scent identification and detection work. The use of detector dogs to find or identify scents or odors has a long history, and has risen dramatically in recent decades in all different areas of detection, including drugs, explosives, missing persons, and more. But even with this increase, there remains a lack of information about the different ways to train dogs in scent identification and detection, and even less about the many ways that training can go wrong. K9 training experts Resi Gerritsen, Ruud Haak, and Simon Prins wrote this book so all trainers have access to the knowledge they need to train capable detector dogs. This book introduces both professional and amateur dog handlers to the basics of scent and odor line-up training and their applications in K9 scent identification and detection work. From training schedules to the fascinating history of nose work in policing, this book is designed to be a practical, accessible, and informative resource for K9 officers, professional or volunteer search-and-rescue workers, competitive dog trainers, and enthusiastic hobbyists alike.

Curious about surveillance? Wondering about the security of your computer or phone? These are just a couple of starting points. The author, with decades of experience in the field, takes us on a journey through the digital landscape. Exhaustively researched, with hundreds of links, it's nevertheless written in an informal and entertaining style. Do you know the difference between "a web browser" and "the internet"? That's about all you'll need, to start. When you're done with this book, you'll know more than most IT (information technology) professionals do about digital security. You'll be able to analyze the claims made by tech bloggers and those who flog their own products. You'll know much, much more about the risks to your privacy and anonymity--and why they're both so important--in today's fast-moving world. Then, at the end, the author tells how he once went to jail for trying to help protect thousands of college students (including himself). It's a chilling reminder of just how easily "spin" can replace substance. And yet, it's a funny story. Come on in and give this book a try. You'll be glad you did. CONTENTS: 1. U.S. ARMY AEROMEDICAL EVACUATION CRITICAL CARE FLIGHT PARAMEDIC STANDARD MEDICAL OPERATING GUIDELINES - CY23 Version Published January 2023, 318 pages 2. TCCC Guidelines for Medical Personnel - 15 December 2021, 19 pages 3. JTS Clinical Practice Guidelines, 2,260 total pages - current as of 19 September 2023: INTRODUCTION The SMOG continues to go through significant improvements with each release as a result of the collaboration of Emergency Medicine professionals, experienced Flight Medics, Aeromedical Physician Assistants, Critical Care Nurses, and Flight Surgeons. There has been close coordination in the development of these guidelines by the Joint Trauma System, and the Defense Committees on Trauma. Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre-hospital units. It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense. Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics (CCFP) ability to follow and execute the medical instructions herein. These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments. Unit medical providers are not expected to employ these guidelines blindly. Unit medical providers are expected to manipulate and adjust these guidelines to their unit's mission and medical air crew training / experience. Medical directors or designated supervising physicians should endorse these guidelines as a baseline, appropriately adjust components as needed, and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics, Enroute Critical Care Nurses, and advanced practice aeromedical providers. The medication section of this manual is provided for information purposes only. CCFPs may administer medications only as listed in the guidelines unless their medical director and/or supervising physician orders a deviation. Other medications may be added, so long as the unit supervising physician and/or medical director approves them. This manual also serves as a reference for physicians providing medical direction and clinical oversight to the CCFP. Treatment direction, which is more appropriate to the patient's condition than the guideline, should be provided by the physician as long as the CCFP scope of practice is not exceeded. Any medical guideline that is out of date or has been found to cause further harm will be updated or deleted immediately. The Medical Evacuation Concepts and Capabilities Division (MECCD) serves as the managing editor of the SMOG and are responsible for content updates, managing the formal review process, and identifying review committee members for the annual review. The Standard Medical Operating Guidelines are intended to provide medical procedural guidance and is in compliment to other Department of Defense and Department of the Army policies, regulatory and doctrinal guidance. Nothing herein overrides or supersedes laws, rules, regulation or policies of the United States, DoD or DA.
