It all began with the initial chance meeting of this book's author, Katie Anderson, and the book's subject, Isao Yoshino. She was an American leadership coach and consultant in her mid-career, with a newfound love of Japanese culture. He was an accomplished Japanese people-centered leader at the end of his corporate career, with a lifelong love for American culture and 40 years of inside experience with the Toyota Way. During the next five years,

Anderson and Yoshino spent countless hours learning from each other, reflecting on the past, and envisioning the future. The resulting book - written by Anderson and focused on the profound lessons offered by her mentor Yoshino -- is a beautiful, one-of-a-kind tapestry. Much like the weaving of fabric -- where the beginning work is but a glimpse of the final pattern -- this book was created from many layers of intertwined conversations and reflections. If you've ever been mentored -- in business or in life -- by someone whose words, experiences, and perspectives changed you for the better, you know that an entire book of such selfless generosity and deep wisdom could change the world. For today's business professionals -- dedicated to continuous learning and people-centered leadership -- this is that book. Learning to Lead, Leading to Learn is a leadership book that defies generational or cultural divides, offering a refreshing, proven perspective for all those who dare to lead. The Best Leaders

Never Lose the Humility for Learning Learning to Lead, Leading to Learn is much more than a collection of Isao Yoshino's personal stories and insights. It's a memorable, entertaining, and poignant way to highlight important leadership lessons, to record pivotal moments in Toyota's history, and to create something to help veteran and aspiring leaders reflect and learn about themselves. Yoshino's experiences help us understand how Toyota intentionally developed the culture of excellence for which it is renowned today, and how one person "learned to lead" so that he could lead with an intention to learn ... every day and in every way. "The only secret to Toyota is its attitude toward learning." -- Isao Yoshino Let the Past Inform the Future: The Role of Reflection in Leadership By looking back at the past, we can learn and therefore shape our future. Through each story in this unique and inspiring book, Anderson shares Yoshino's experiences with leadership and learning, and his efforts at self-

improvement while empowering others. Through those stories, you'll hear his reflections on what he learned then ... and what he is re-learning now with a different perspective as he looks back at the totality of his career. A must-read for those who: -- Want to become more people-centered leaders -- Currently practice lean or continuous improvement methods -- Serve in leadership, coaching, or operational management roles -- Want to learn more about Toyota's history and culture -- Are inspired by heartwarming stories of personal discovery and leadership With a foreword by John Shook, Chairman of the Lean Global Network.

At present, how to develop industries is a burning issue in Africa, where population growth remains high and economic development has thus far failed to provide sufficient jobs for many, especially young people and women. The creation of productive jobs through industrial development ought to be a central issue in steering economic activity across the continent. The authors of this book, consisting of two development economists and five practitioners, argue that the adoption of Kaizen management practices, which originated in Japan and have become widely used by manufacturers in

advanced and emerging economies, is decisively the most effective first step for industrial development in Africa. This open access book discusses what Kaizen management is, why it is applicable to Africa, and why it can provide Africa with a springboard for sustainable economic growth and employment generation.

Toyota experts at the Georgetown, Kentucky plant, formally trained David Meier in TPS. Combined with Jeff Liker's extensive study of Toyota and his insightful knowledge the authors have developed unique models and ideas to explain the true philosophies and principles of the Toyota Production System. Workers, Managers, Productivity Springer In my previous book on Japanese Quality in the Industry, we talked about how the Japanese invent the TOTAL QUALITY MANAGEMENT out of sheer necessity for the survival of the company. We said that quality is not a theoretical concept but on the contrary, it is 100% practical, simple, basic and that it took place in the production workshop. No matter how much we read books and attend courses and more courses on total quality, we will never assimilate the principles if we do not understand the correct mentality. The most important thing is to understand and assimilate the mentality that should guide us on the path of excellence to achieve the real implementation in the company of the continuous improvement or KAIZEN system within the Japanese quality system or TOTAL QUALITY MANAGEMENT. We can say without fear of being wrong, that the "sine qua non" condition is that previously we must understand, practice and implement the total communication system that the Japanese call HOU-REN-SOU: HOUKOKU, RENKAKU, SOUDAN or in other words: INFORM, COMMUNICATE, CONSULT. When I started my first work experience as Quality Director within the Japanese company it would not even have occurred to me to think about the importance of HOU-REN-SOU. I often kept the information to myself or prepared a report by myself and when it was finished and cleaned, very proud of the good work done, I presented it to the Japanese president of the company in a quality committee or in the weekly steering committee. Those presentations usually ended, against all odds, like a real disaster. I remember that the Japanese got very angry and argued with each other. Personally I was annoyed that they looked down on such a detailed and even beautiful report that I certainly hoped to show off. What was wrong with them? But for the Japanese it was very difficult, if not impossible, to understand why I had not shared the information with other department heads before officially presenting it in a meeting. They didn't even understand why I had withheld relevant information from the management until that moment. I replied that I was informing them at that very moment and that I had

waited to have the report ready. Now I can understand that they really were unable to understand me no matter how much I tried to explain to them. The president of the company, a short Japanese man, elderly, always elegant and from the old school, looked at me very angry and clasped his hands so that the palm of the right hand was facing downwards and the one of the left was facing up and joining. the fingers of both hands pulled them hard in opposite directions and kept repeating HOU-REN-SOU, HOU-REN-SOU, HOU-REN-SOU ... let's see what he wanted to tell me!
