conservation. Marsupial specialists Stephen Jackson and Karl Vernes examine our sustained fascination with kangaroos—spanning 40,000 years—that allows these engaging marsupials to be instantly recognised by people the world over. The amazing diversity of this group of animals is revealed, ranging from tiny forest dwellers and tree kangaroos to large majestic animals living on the open plains of central Australia and the giant kangaroos that once roamed the Pleistocene landscape. The authors also investigate the natural history of kangaroos - their unique reproduction methods, intriguing behaviour, varied diet and trademark hopping ability - all of which make them such fascinating animals.

With Waypoint Kangaroo, Chen makes his debut with this outer space thriller. Kangaroo isn't your typical spy. Sure, he has extensive agency training, access to bleeding-edge technology, and a ready supply of clever (to him)

quipps and retorts. But what sets him apart is " the pocket. " It ' s a portal that opens into an empty, seemingly infinite, parallel universe, and Kangaroo is the only person in the world who can use it. But he's pretty sure the agency only keeps him around to exploit his superpower. After he bungles yet another mission, Kangaroo gets sent away on a mandatory " vacation: " an interplanetary cruise to Mars. While he tries to make the most of his exile, two passengers are found dead, and Kangaroo has to risk blowing his cover. It turns out he isn ' t the only spy on the ship – and he ' s just starting to unravel a massive conspiracy which threatens the entire Solar System. Now, Kangaroo has to stop a disaster which would shatter the delicate peace that ' s existed between Earth and Mars ever since the brutal Martian Independence War. A new interplanetary conflict would be devastating for both sides. Millions of lives are at stake. Weren ' t vacations supposed to be relaxing?

A companion series to our "Competitive Mathematics for Gifted Students," the series "Math Challenges for Gifted Students" offers additional material in practice test form. The workbooks are useful for assessment and for development of testing skills. In full color and with fully detailed solutions, the workbooks may be used as a fun introduction to competitive problem solving. However, the problems are a bit more difficult than actual Kangaroo problems, exploring a large number of known 'tips and tricks.' One could say it is much more concentrated in that, unlike actual exams, it has less 'filler' - almost every problem is 'tricky' and embodies a specific strategy. The material

is excellent for training purposes and has been used by the authors in seminars with hundreds of the most gifted students in the Bay Area. The workbook contains six 24-question tests. After each test there is an answer key. The tests are followed by detailed solutions. The recommended time limit for each test is of 75 minutes. Students who have not been exposed to competitive problem solving will find this book extremely difficult and will need help from an adult. Without preparation, students who get 'A' in school generally score about 50 points out of 96 possible on Kangaroo level 1-2.

Birds of Kangaroo Island Disha Publications

Regional bird field guides are few and far between in South Australia and Chris Baxter's photographic guide to the birds of Kangaroo Island is the stand-out in this genre. This comprehensive account covers all 267 bird species recorded on the Island or offshore over the seas. It builds on the annotated list produced by the same author in 1989 and revised in 1995. The photographs provided by some of Australia's most highly regarded photographers beautifully

illustrate the detailed descriptions of the birds, their habits, habitats, breeding, status, abundance and distribution on the Island. In addition there are recommendations on where to look for each species, with cautions about not getting too close to endangered birds and their nests. Chris Baxter has called on a lifetime of bird watching on Kangaroo Island and observations from visitors and residents to present an attractive field guide that is a must for all birdwatchers from casual observers to serious ornithologists.

Sirens: Collected Papers 2009-2011 combines written versions of presentations from three years of Sirens, a conference on women in fantasy literature. During those years, presenters were encouraged to analyze women warriors, fairies, and monsters. Presentations for Sirens were chosen by vetting boards made up of scholars, professionals, and readers. Following each year's conference, presenters were invited to submit text versions of their presentations for the Sirens compendium; twenty-five of the nearly ninety presentations from 2009-2011 are represented in these collected papers.
