This Student Book provides a grammar-led approach with extensive exam preparation to develop independent, culturally aware students of German, ready for the exam. This book is endorsed by Cambridge International Examinations for the latest IGCSE(R) (0525)

and International Level 1/Level 2 Certificate (0677) syllabuses. Extensive use of German reflects the style of the exams and, with specific advice and practice, it helps students use the acquired skills to their best ability. Topics on German-speaking cultures are integrated throughout to ensure students gain the cultural awareness that is at the heart of this qualification. - Develop students' ability to use German effectively - Stretch and challenge students to achieve their best grades - Ensure the progression required for further study at A-level or equivalent - Provide insight and encourage a positive attitude towards other cultures The book provides up-to-date content following a clear sequencing of topics designed specifically for teaching German at this level. It is designed to develop spontaneous, confident linguists who are able to progress to further study of German. - Teacher Resource + Audio-CDs (ISBN 9781471833076) includes all recordings and transcripts together with detailed guidance, editable vocabulary lists, cultural PowerPoints and interactive quizzes - Grammar Workbook (ISBN 9781471833182) Vocabulary is also available online at Vocab Express, an interactive learning application Visit www.vocabexpress.co.uk/ hodder for more information

Objective Proficiency Workbook with Answers with Audio CD Heinemann
 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and

survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are

nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

This new edition of the BETA MATHEMATICS HOMEWORK BOOK now contains even more of the questions and activities for which David Barton is famous: well graded, interesting, and linked throughout to real-world applications. The exercises in the Workbook are matched to corresponding exercises in BETA MATHEMATICS 2E, (ISBN 9781741038842) making it easy for teachers to choose, and students to do, homework, extra practice and revision that matches

what is done in class. As with BETA MATHEMATICS 2E, the contents of this Workbook are organised into the three Strands of Level 5 (Years 9 and 10) Mathematics in the New Zealand Curriculum, and the examples and exercises follow the spirit of the Numeracy Project. The BETA MATHEMATICS WORKBOOK is organised so that each two page sheet can be removed from the book and handed in for assessment. More room has been provided within questions, for students to demonstrate their mathematical skills. Computers provide mathematicians, engineers, accountants and many other professionals with instant feedback in their explorations of

number patterns and relationships. The BETA MATHEMATICS CD in this Workbook features PowerPoint® worked examples, data sets, spreadsheets and LiveMath™ computer algebra activities to give students practice with this vital aspect of maths. It also gives links to many internet sites that explain and illustrate mathematical concepts in detail.
