Jenna Fischer's

Hollywood

journey began at the age of 22

when she moved to Los Angeles

from her hometown of St. Louis. With a

Louis. With a

theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a

handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable

and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams

(auditions in a guy's apartment are probably not legit—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor. Small Engines and Outdoor Power Equipment, Updated 2nd Edition Causey Enterprises, LLC For the first half of the 20th century Great Britain led the world in motorcycle design and production, exporting its products to countries in every section of the globe. However, as the second half of the century began in 1960 this once great industry commenced what was to be a terminal decline.

During the 1960s and '70s Britain still manufactured a wide range of machines, but a combination of poor management, lack of investment, foreign competition (notably from Japan), and the arrival of the small, affordable car transpired to effectively sound the death knell of the British motorcycle by the end of the 1970s.
