In a breakthrough Organization Man for the twenty-first century, bestselling author Art Kleiner reveals that every organization is driven by a desire to satisfy a Core Group of influential individuals and explains why understanding this group's expectations is the key to success. When corporate leaders announce, with seeming sincerity, "We make our decisions on behalf of our shareholders,"

their words are taken at face value. But as recent news stories prove, this imperative is routinely violated. In Who Really Matters, Art Kleiner argues that the dissonance between a declared mission and actual operation can be seen at organizations large and small. All organizations have one motive in common.

Every decision—which projects to back, who to promote, or how to spend money—is affected by the perceived wants and needs of a core group of people "who really matter." The composition of the group can differ from organization to organization. Often, the most senior people in the hierarchy are members—but not always. Sometimes, the people who "matter" can extend far down the corporate ladder, or even reach outside the company to include key customers, labor union leaders, and stockholders. Kleiner gives readers clues about how to identify a core group's real mission by observing its day-to-day actions, listening to the fundamental message it sends employees, examining its management of new members; understanding the ideas that shape its policies about management, money, and the way the world works; and avoiding the taboos governing the way it operates. Whether you're a member of the Core Group—or want to be—this deft, engaging blend of argument and observation, anecdotes and

advice, is the one guide you'll need to achieve your career goals and aspirations by navigating the hidden pathways in any organization, large or small.

Founded by Dudley and Humphrey Pierce in 1913, the Auto Body Works, of Appleton, Wisconsin, became noted for producing custom utility bodies on commercial truck chassis. In 1939, the Auto Body Works began building fire apparatus bodies to supplement its business. The company would eventually assume the name of Pierce Manufacturing. Propelled by an association with the famous Snorkel device and the introduction of products that would become fire service trends, Pierce became the new giant in the fire apparatus industry. Today, Pierce Manufacturing is a division of the Oshkosh Truck Corporation. This work informatively and vividly illustrates the history of Pierce fire apparatus from its first fire apparatus bodies to its ultra-modern machines of today. The progression of Pierce fire apparatus is displayed through the use of black and

white photographs from both well-known fire apparatus photographers and company archives. Included are apparatus deliveries from every state in the United States, as well as exports to other countries, and examples of nearly every model and variation produced by Pierce. A vibrant color gallery shows fire apparatus in a wide array of color schemes specified by Pierce customers and displays the finest photographs available.
