The Manual for the Surveillance of Vaccine-Preventable Diseases, updated through

2013, provides current guidelines for those directly involved in surveillance of vaccine-preventable diseases, especially personnel at the local health departments. For each of the vaccine-preventable diseases, this manual includes a chapter describing the importance of rapid case identification; the importance of surveillance; disease reduction goals; case definitions (including clinical description and case classifications); epidemiologically important data to be collected during case investigation; activities for enhancing surveillance; activities for case investigation; and activities for outbreak control. Other chapters include information on surveillance indicators; surveillance data analyses; reporting adverse events following vaccination; and enhancing surveillance. In addition, the manual includes a section reserved for insertion of state-specific guidance for VPD surveillance and extensive appendices. This manual was first developed in 1996 to provide general guidance to state and local health department personnel who are involved in surveillance activities for vaccine-preventable diseases. This manual answers commonly asked questions regarding the surveillance and reporting of vaccine-preventable diseases and provides information on enhancing existing surveillance systems.
