The MULE 2510 Diesel is powered by a liquid-cooled, 953cc three-cylinder diesel engine that produces high torque at low engine rpm. Air is drawn through an intake located at the top of the cab frame and passes through a cyclone-type air cleaner. This provides the engine with the cleanest, driest air available.

Responding to customer demand for increased power and fuel efficiency (and to keep up with competition), Kawasaki introduced the Mule 2510 in a three-cylinder 950-cubic centimeter diesel version in 2000. The diesel Mule became popular for various industrial uses, underground mining and agricultural applications.

[Kawasaki Mule 2500/2510/2520 KAF620 Engine Motor Rebuilt ...](#)

The diesel Mule was powered by a water-cooled, three-cylinder, four-stroke Daihatsu DM950D diesel engine rated 24.5 horsepower at 3,600 rpm. It gave the Mule a hauling capacity of 800 lbs. and a 1,200 lb. towing capacity. Top speed of the Mule was limited by a governor to 25 mph.

In 1993 Kawasaki introduced the Mule 2510 for those not restricted by storage and transportation limits. The new Mule 2510 was the top-of-the-line UTV complete with a new 617 cc Liquid cooled V-twin engine, Tilting Cargo Box, and Fan-Cooled Belt Drive Converter. In 1997 Kawasaki introduced the Mule 550 based on the original 500 series.
