Part 2- Basic acoustics of wind instruments, in which are presented succinctly, some pertinent aspects related to the physics of the resonant air column. An important aspect discussed is related to the effect of wall material on the vibration modes of the walls of wind instruments. The methods for measuring the acoustical properties of wind instruments are presented. Part 3- Manufacturing of wind instruments, describes the technology used in manufacturing metallic tubes and pipes made of wood. Part 4 - The durability and degradation of materials addresses data about methods for cleaning wind instruments, studies factors producing degradation of organ pipes, describes methods of conservation and restoration of brass instruments and of historical pipe organs. Idaho's state parks have been called the "jewels" of the Gem State. The story of how those jewels came to be involves political intrigue, much resistance, some philanthropy, and a touch of irony. Sen. Weldon B. Heyburn famously said that state parks were "always a political embarrassment." Idaho's first state park was named after him. Today, Idaho's 30 state parks host five million people a year. Visitors come to boat, camp, bike, climb, hike, fish, and make memories in the great outdoors. This book tells the story of Idaho's diverse state parks--from Priest Lake in Idaho's panhandle to Bear Lake in the southeast corner of the state--through a wealth of historical photographs. A variety of parks are featured, including ones that were lost, found, or never came to fruition.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
